

Club du CEPII | Paris, 27 April 2011
Réunion "France-Allemagne: l'impossible convergence?"

Perspectives allemandes: digérer la crise, profiter des réformes sociales et affronter les défis fiscaux

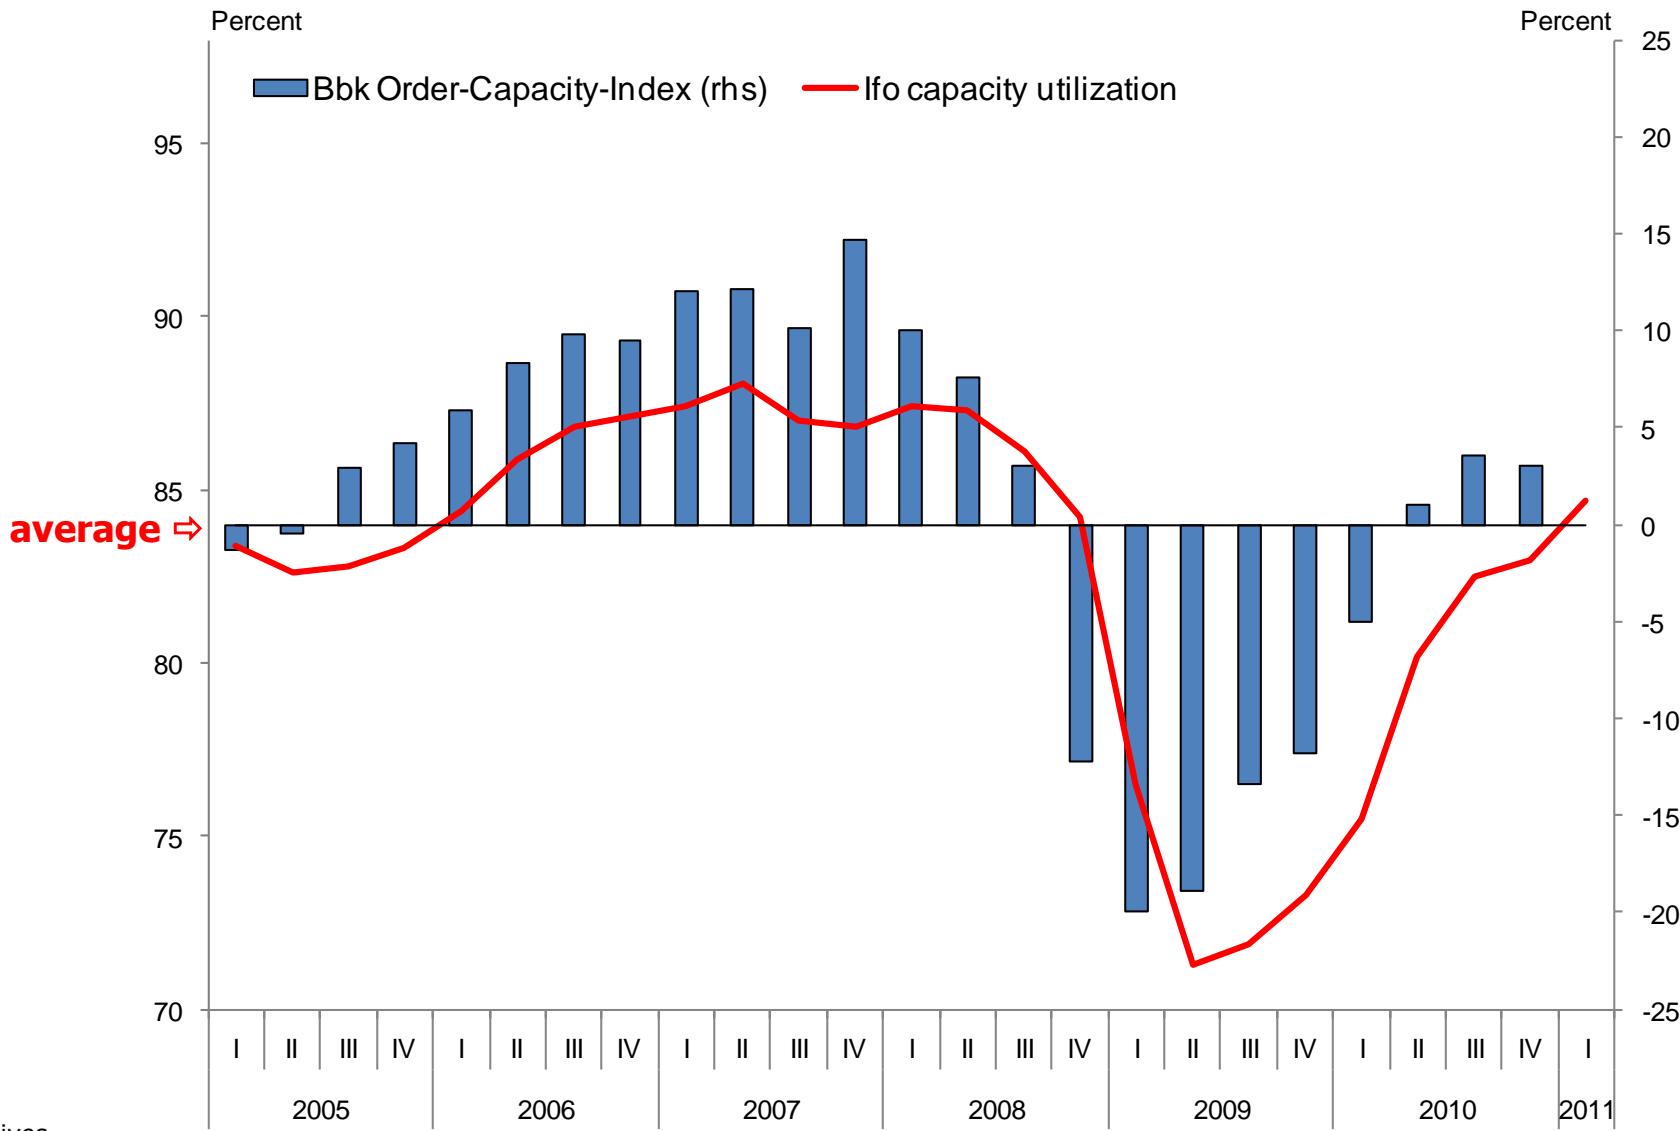

Stefan Kooths
Forecasting Center

The (modest) boom starts ... now!

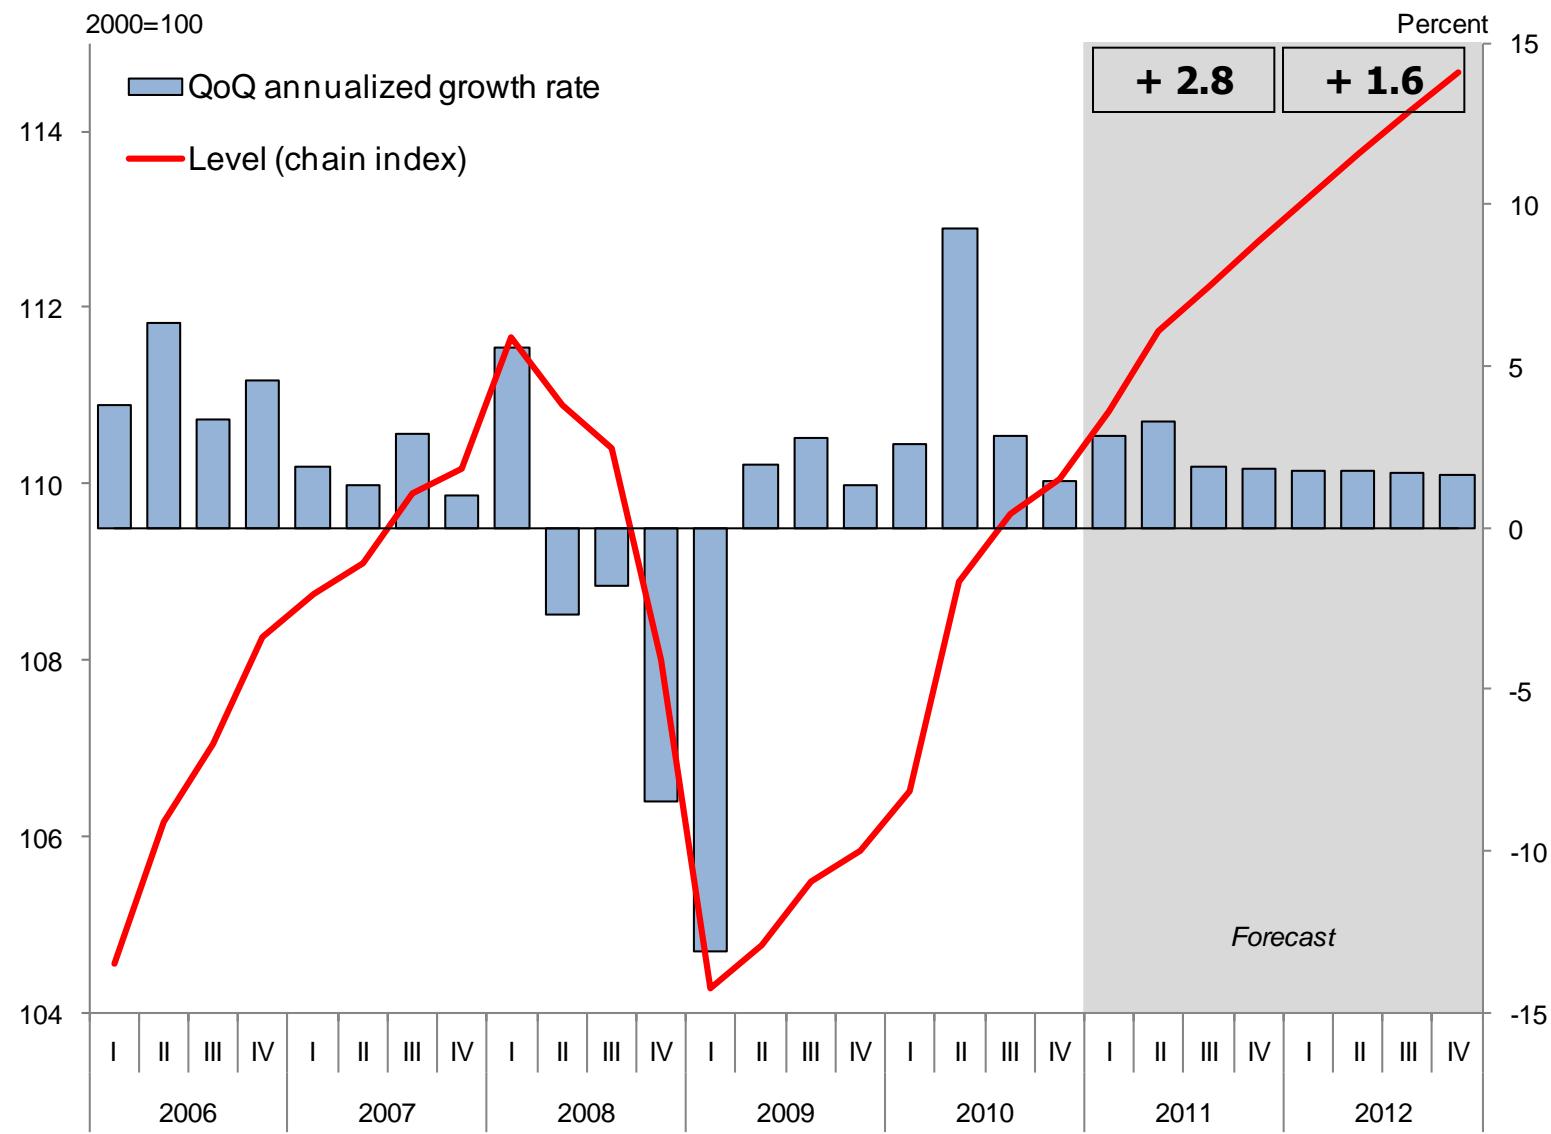

2

Capacity utilization passing normal levels

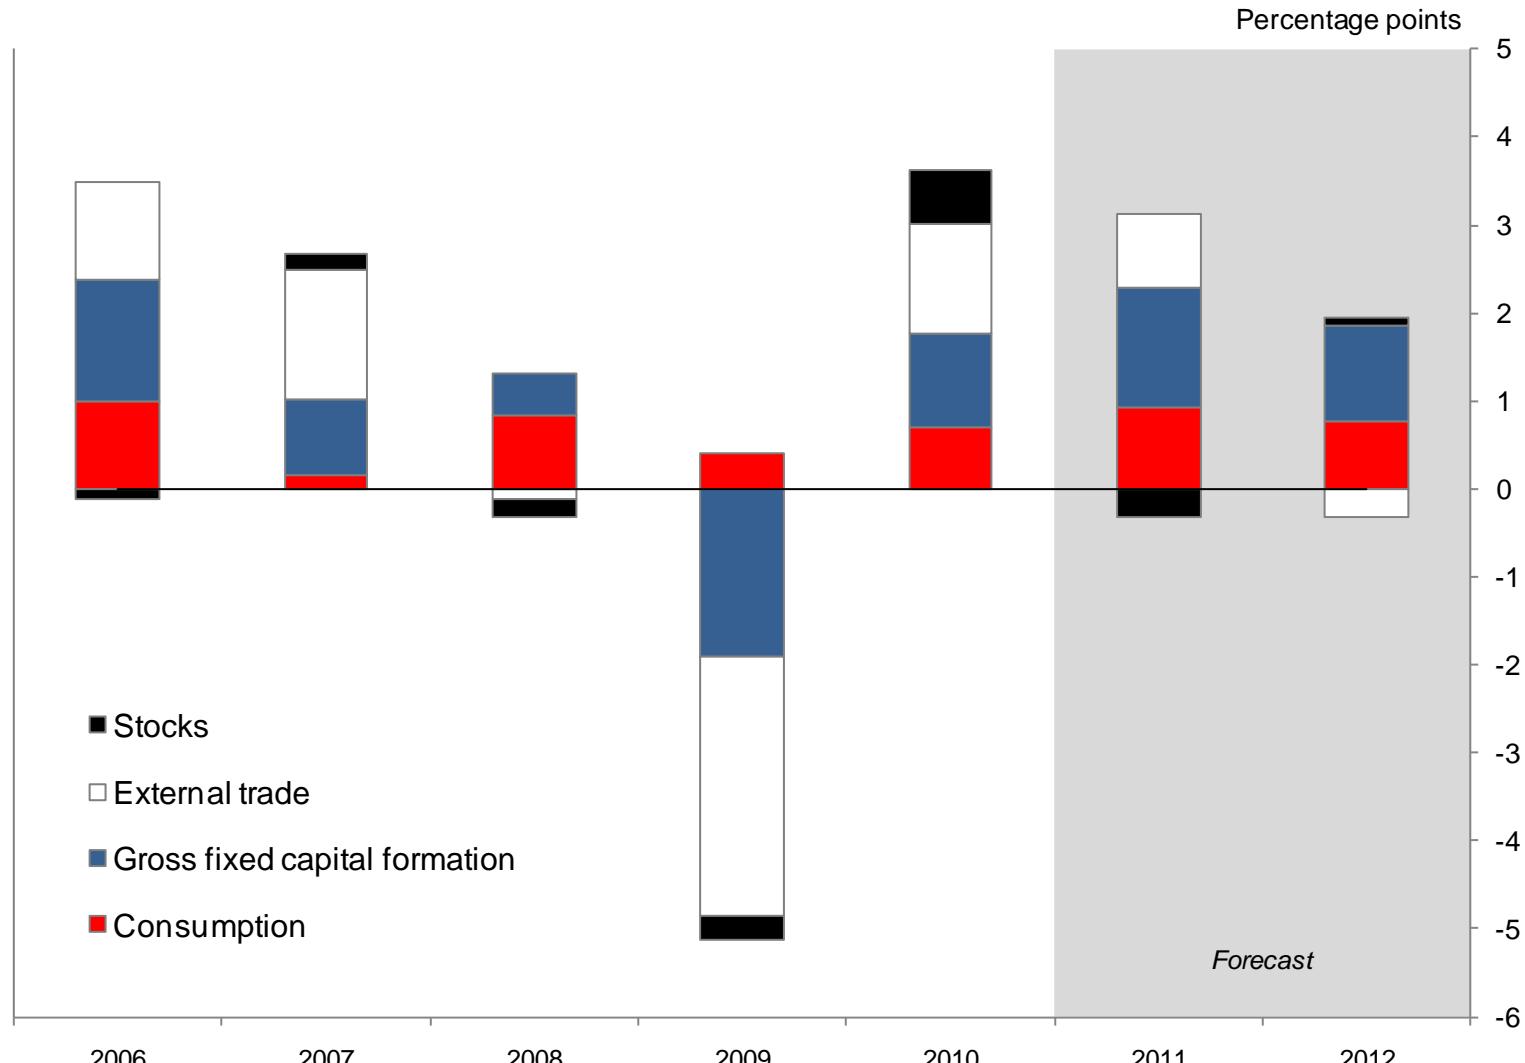

3

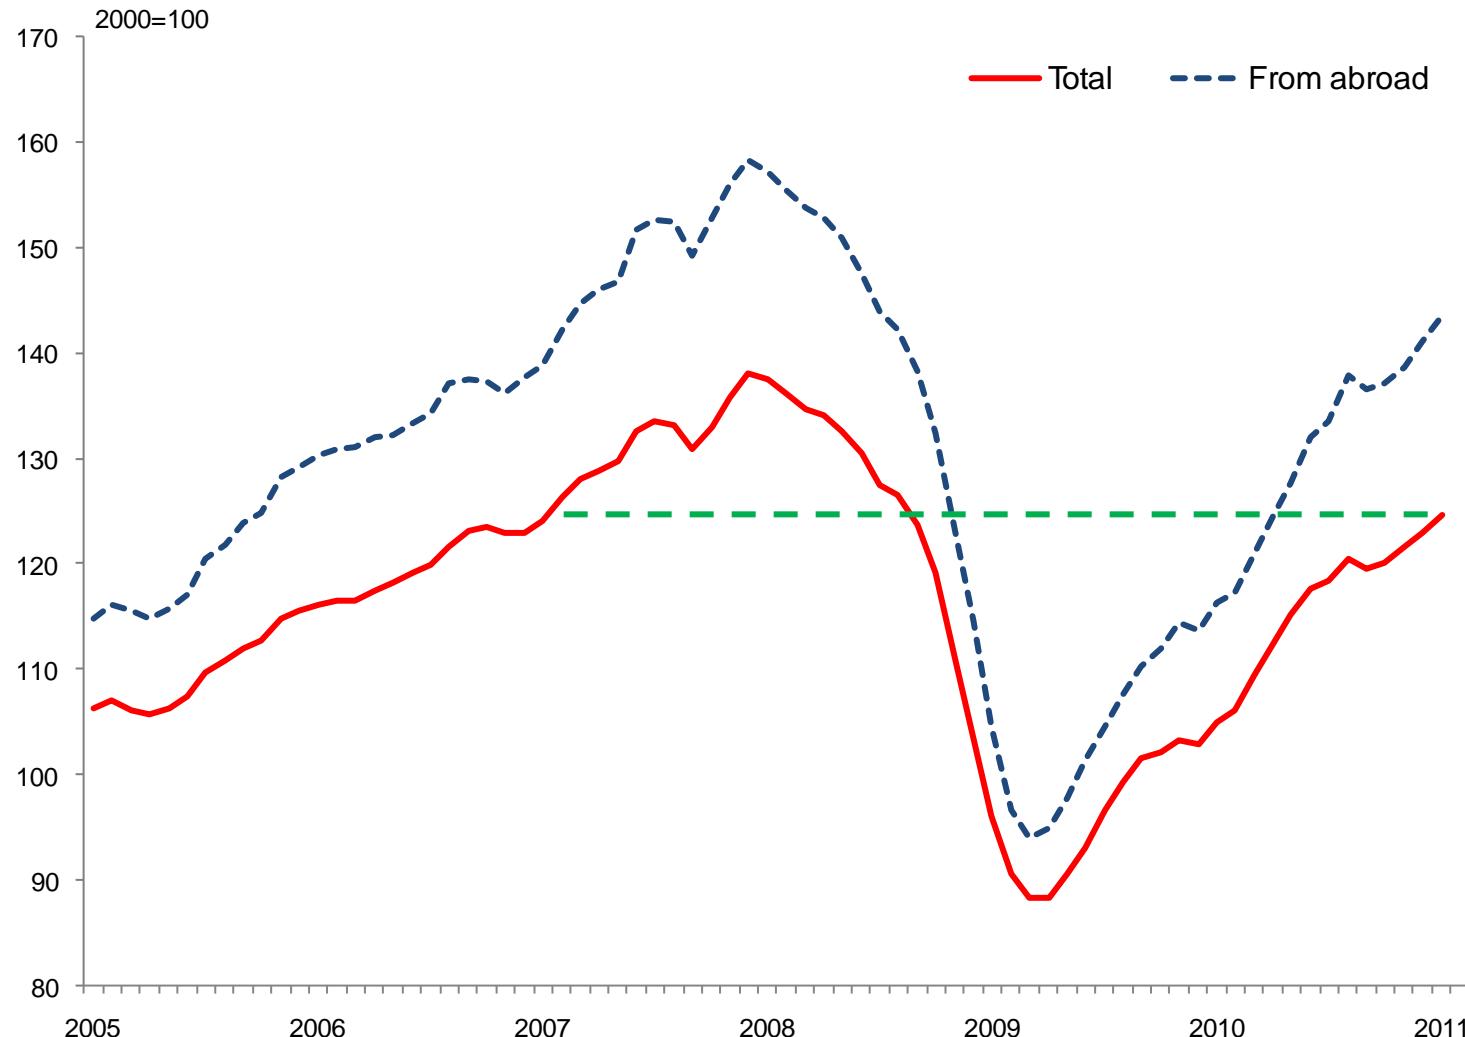

GDP: Weakening upward trend ...

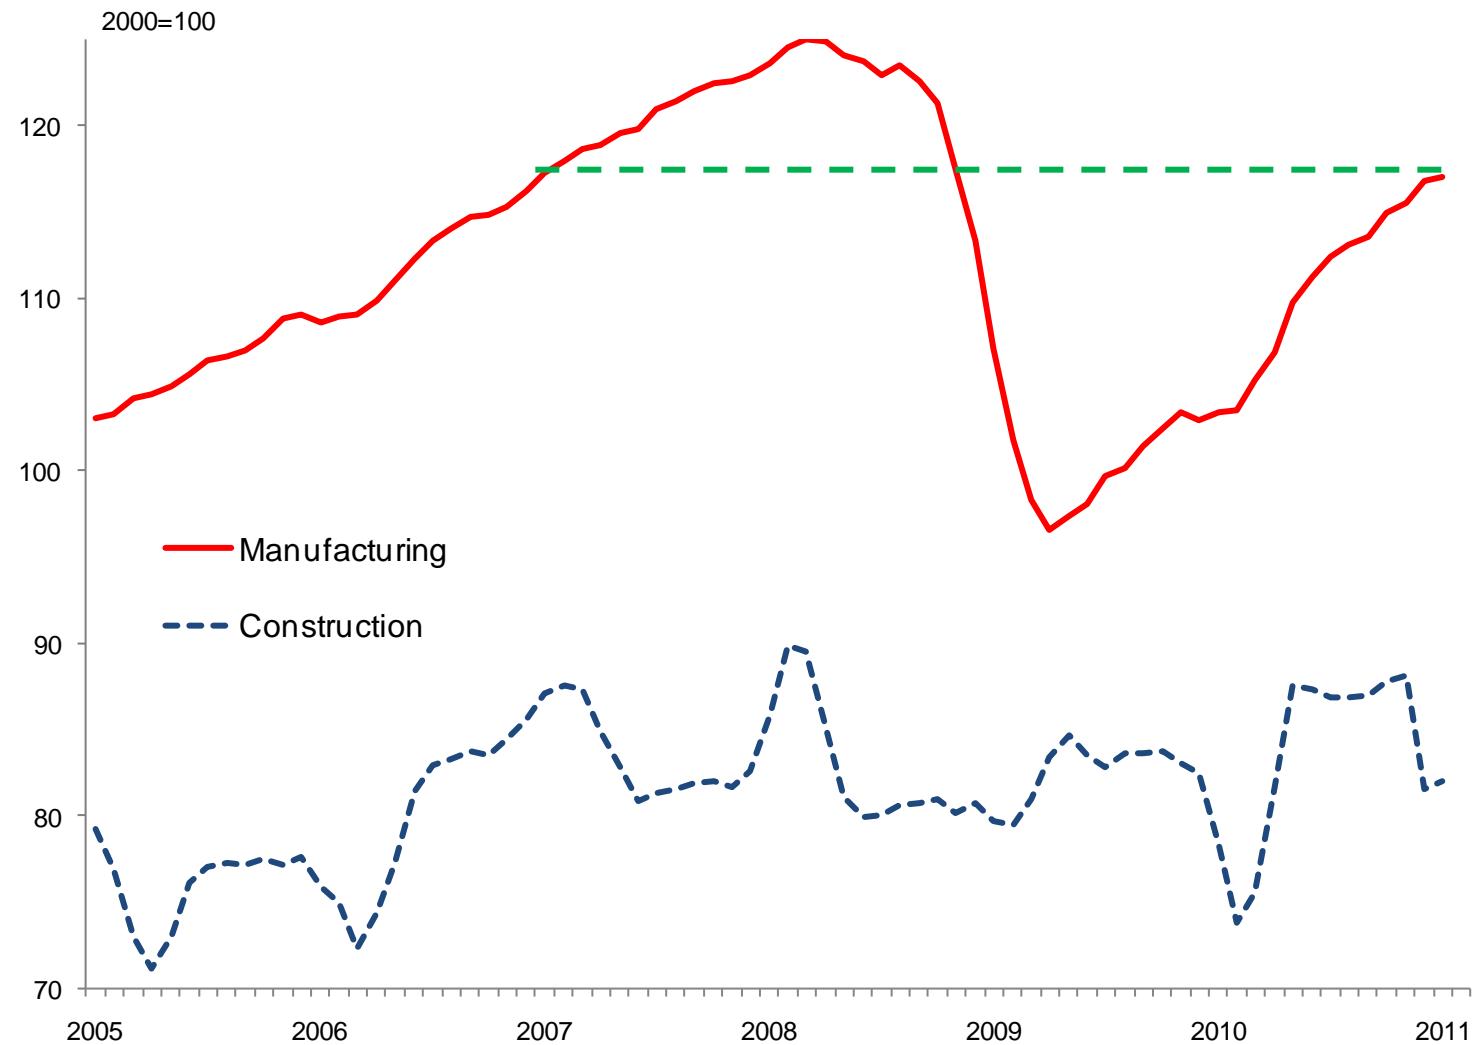

... driven by domestic demand (GDP, cont.)

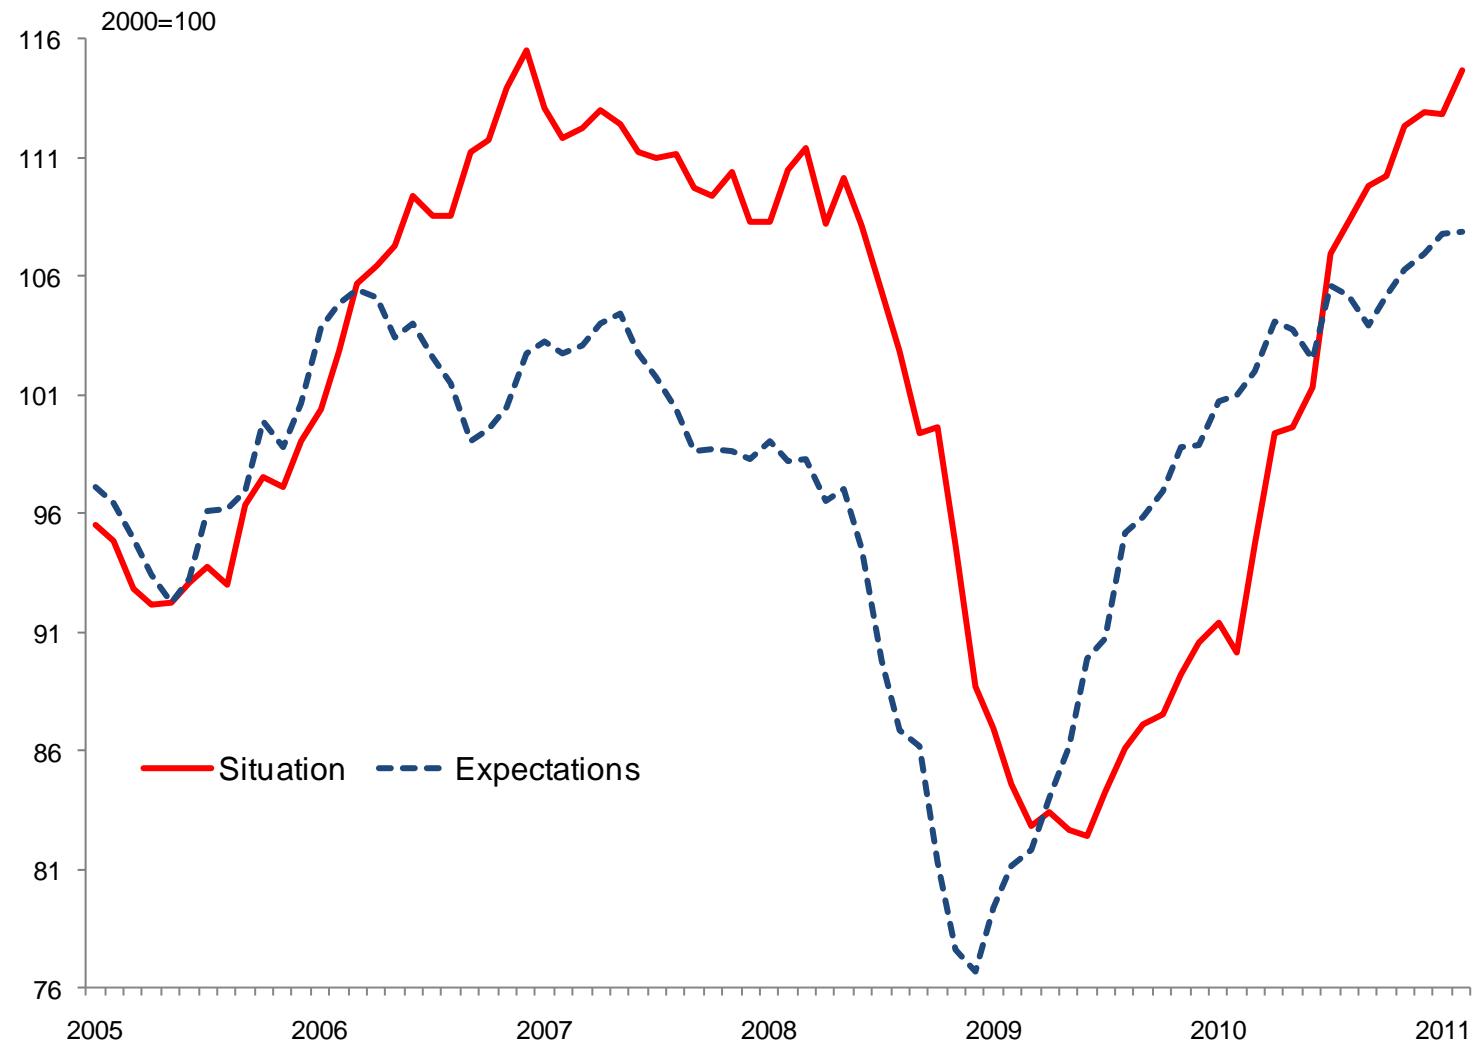

Orders received by industry: Robust, slightly flattening upward trend

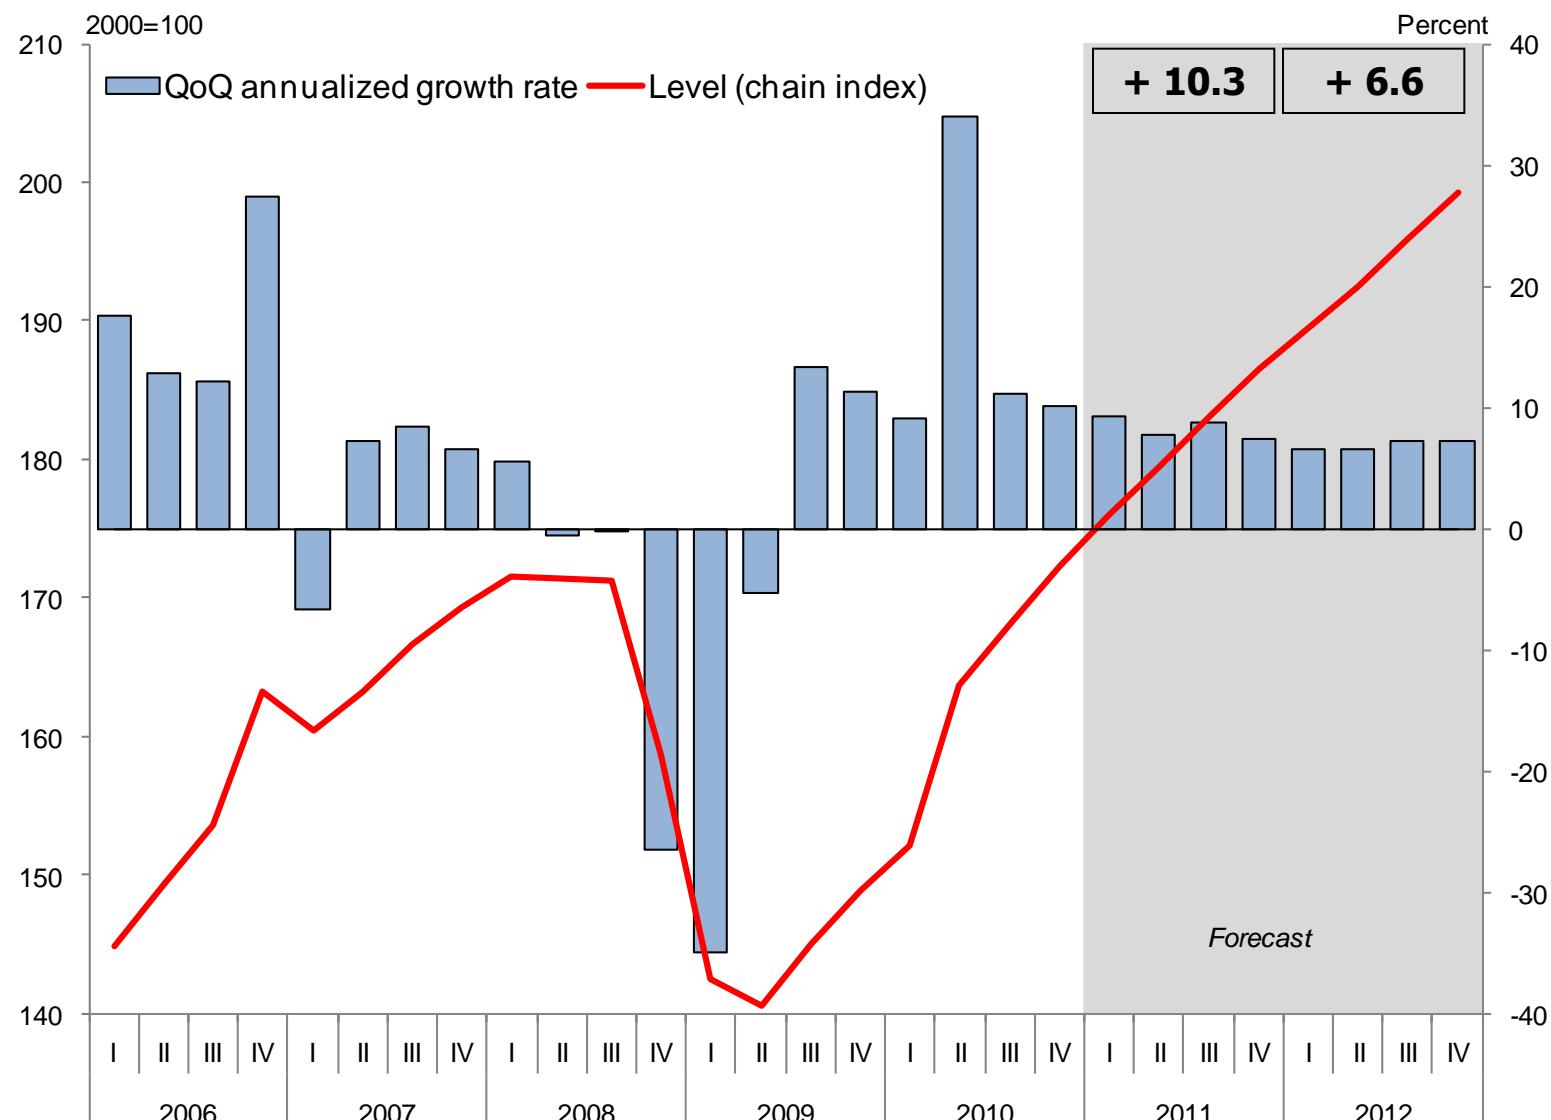

Production: Robust catching-up process

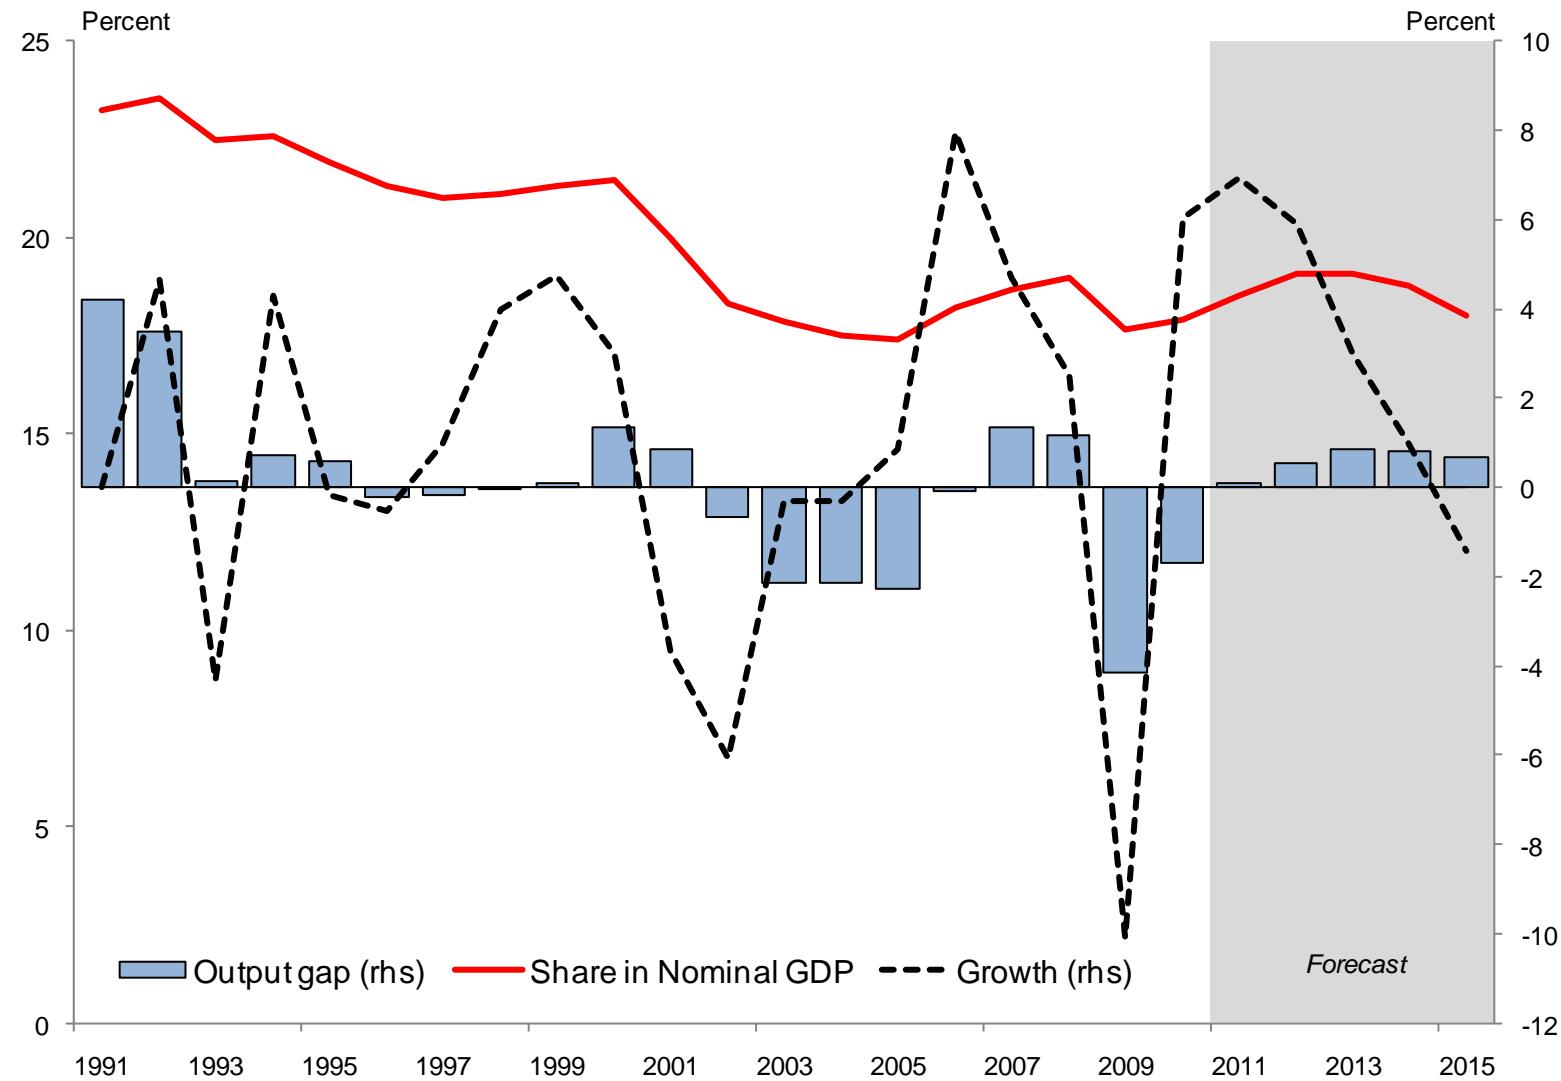

Business climate: A mental boom

Export dynamics lose some momentum

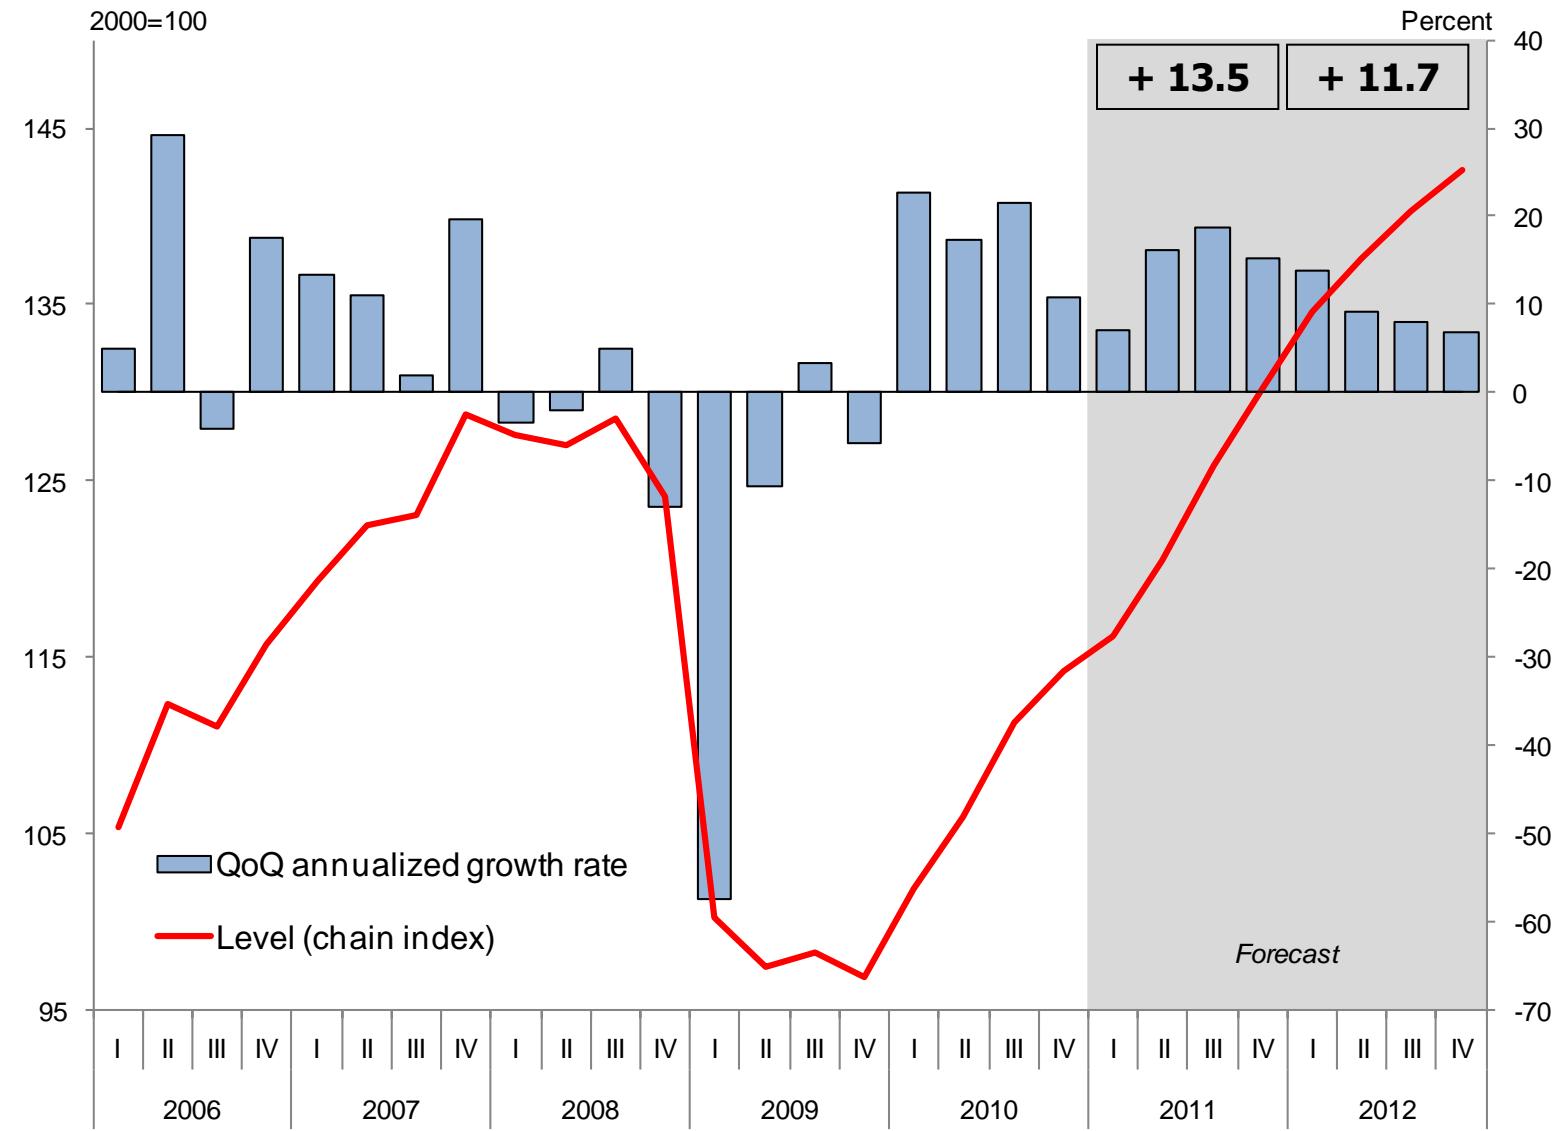

Investment cycle (fixed capital formation)

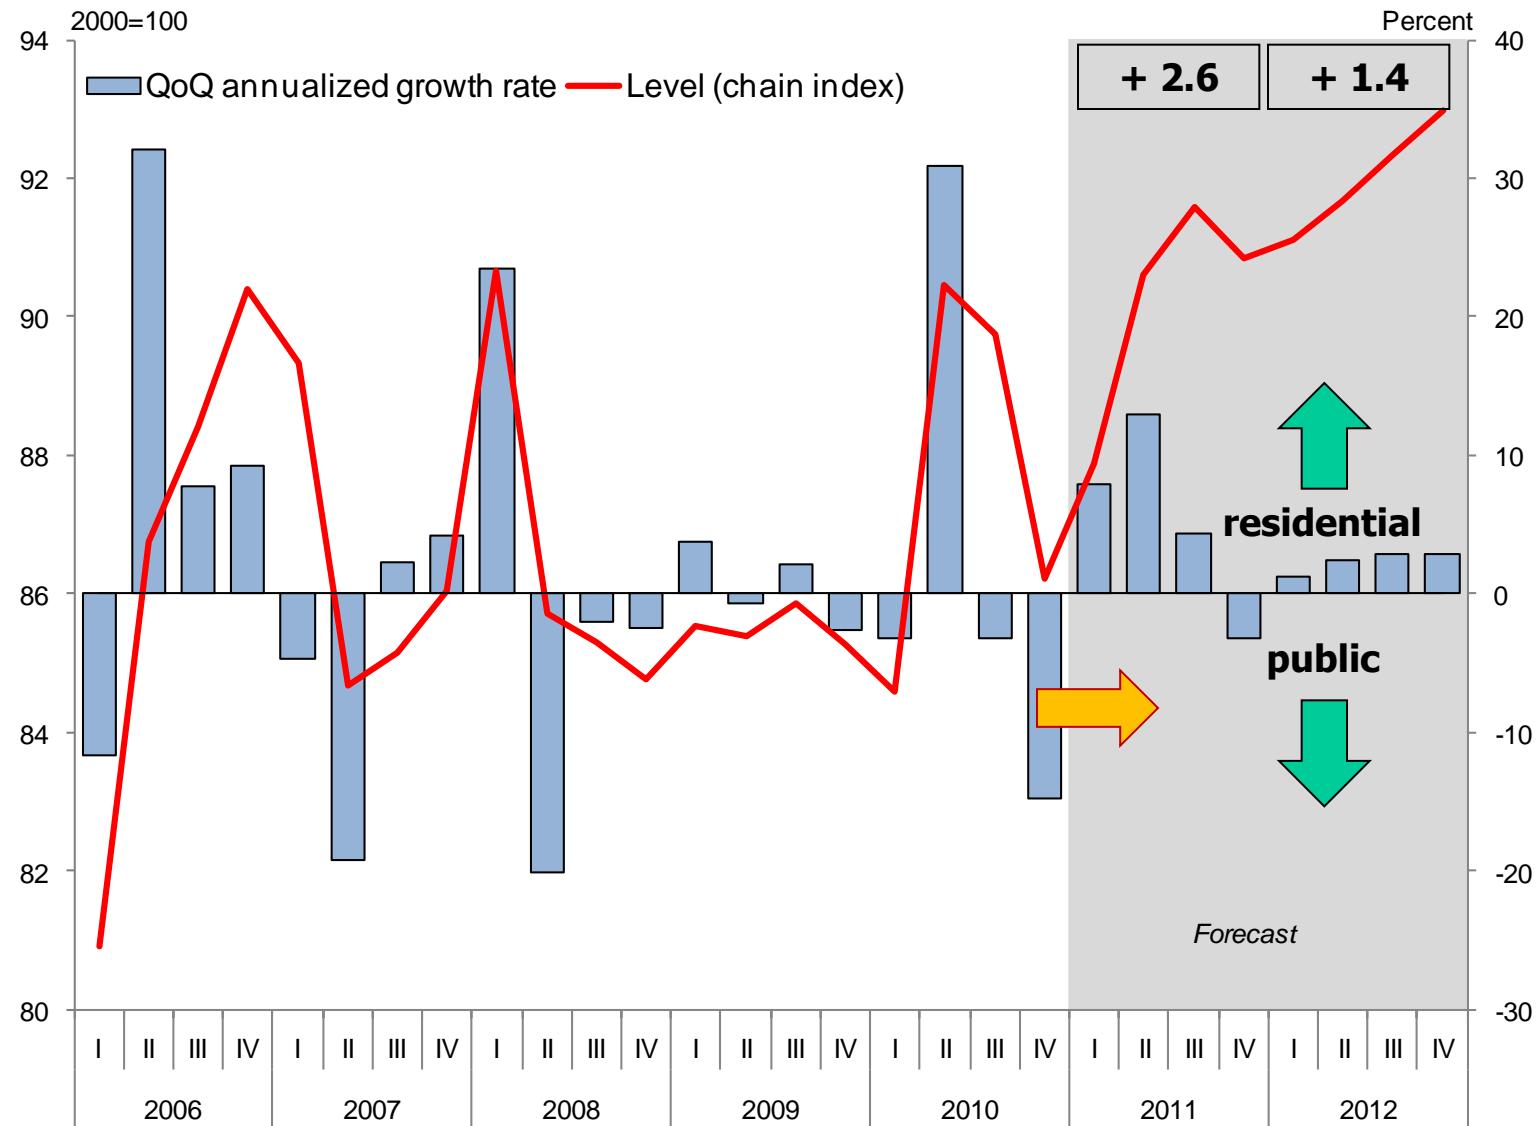

10

M&E investment: Heading for the cyclic peak

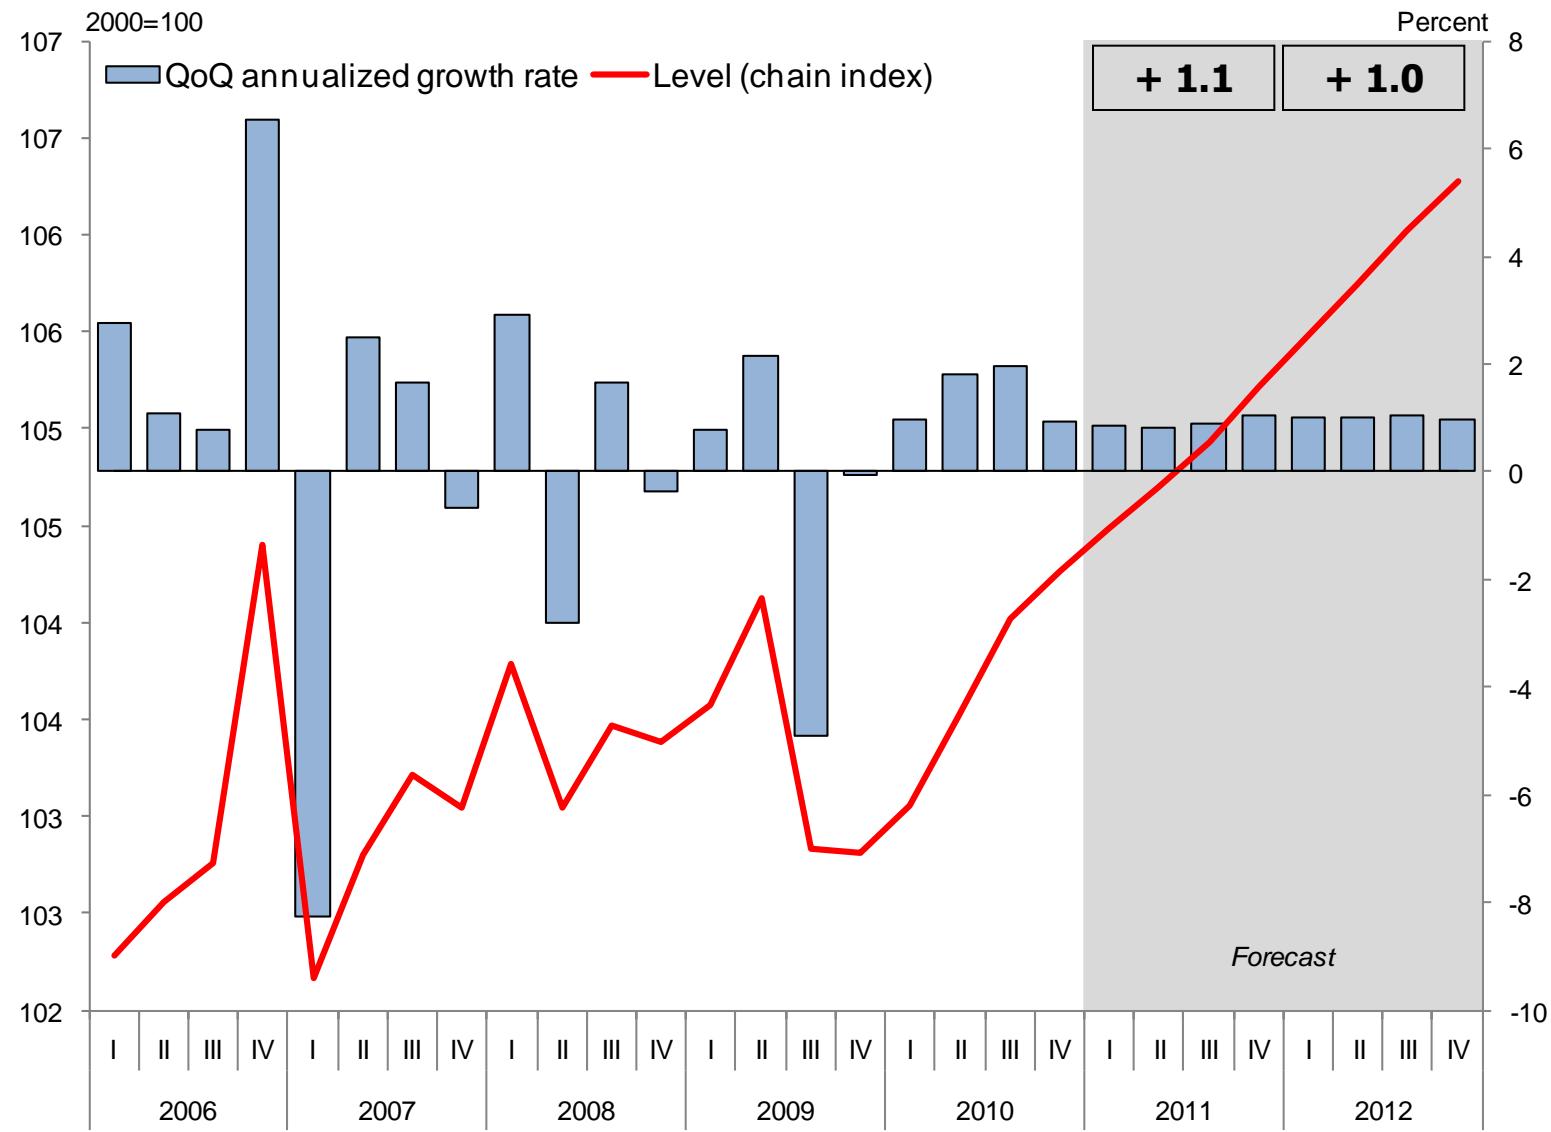

11

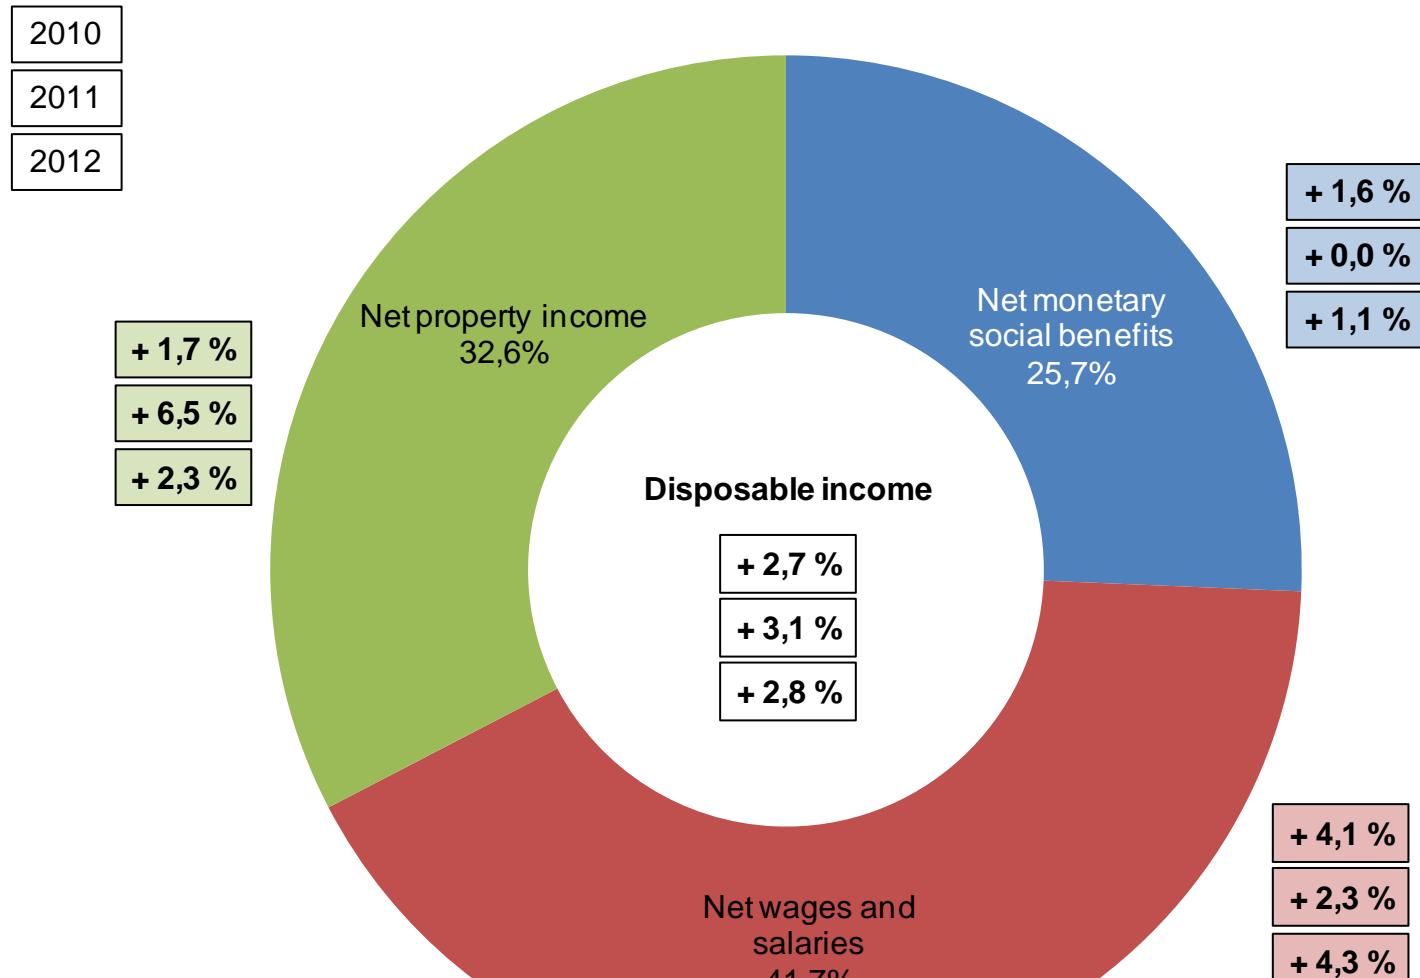

Constructions: Fiscal stimulus packages fade out, monetary stimuli particularly strong

Consumer spending: Slower pace ahead

Disposable income of private households

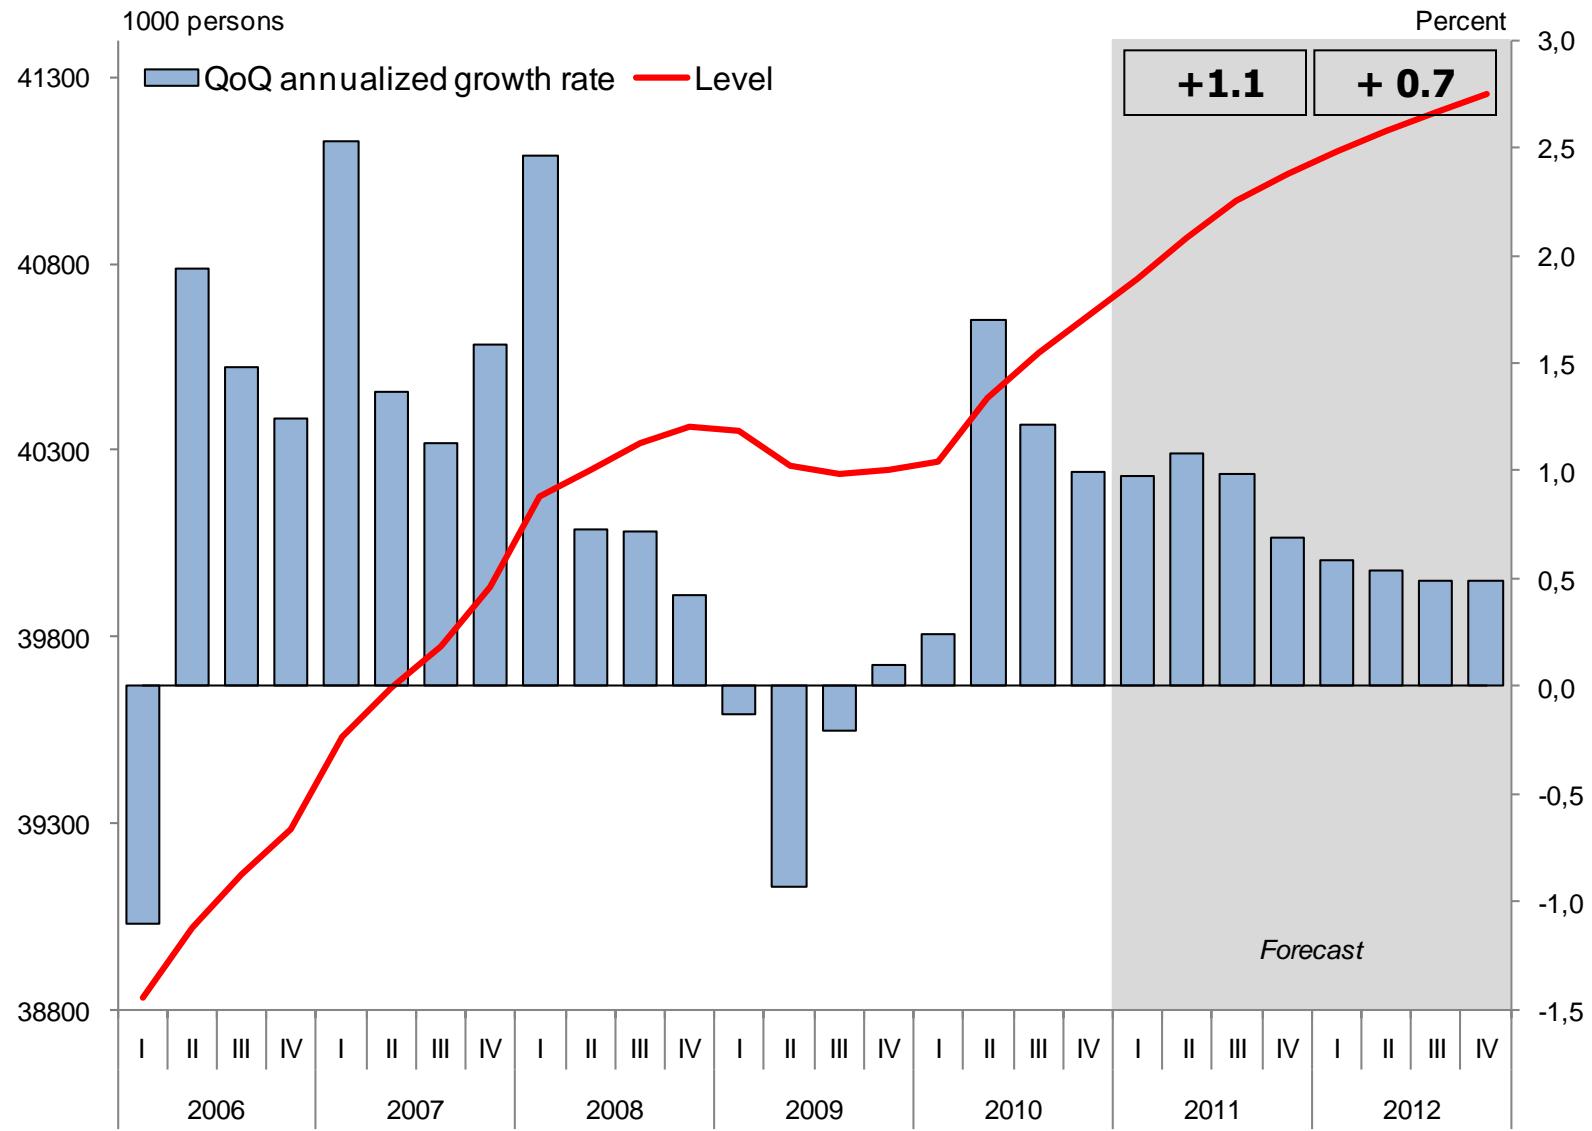

GDP and key components

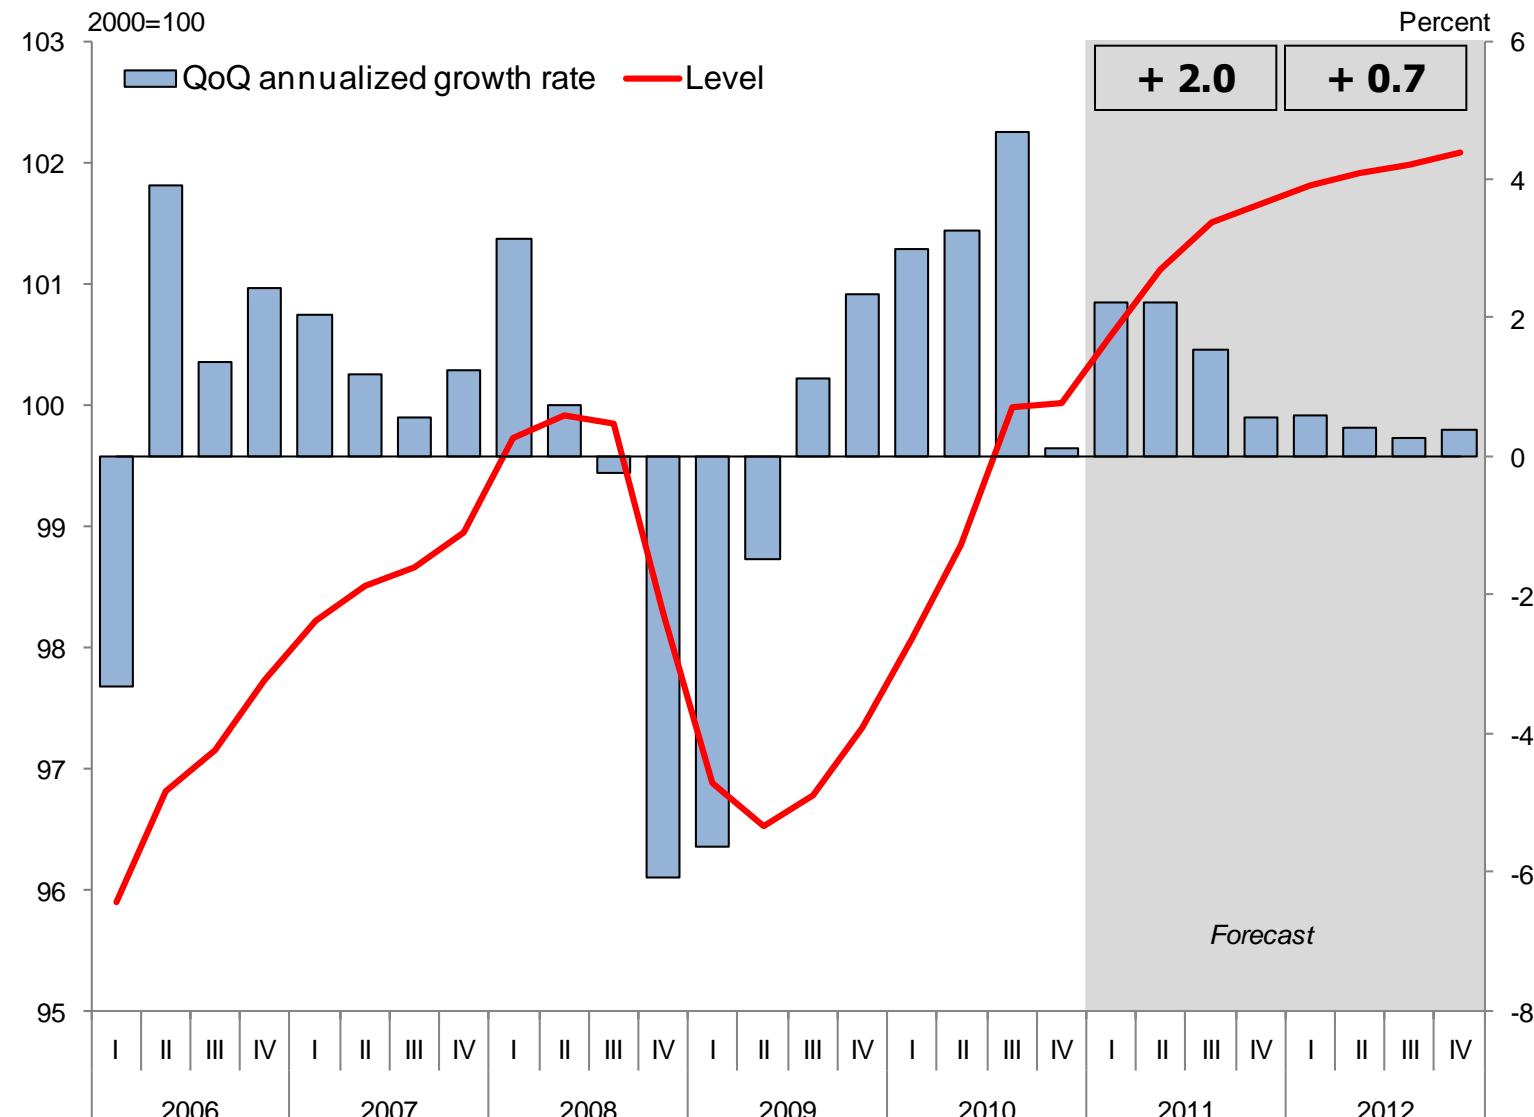

Volumes, change over previous year in percent

	2010	2011	2012
GDP	3.6	2.8	1.6
Private consumption	0.4	1.1	1.0
Public consumption	2.3	1.4	1.1
M&E investment	10.9	13.5	11.7
Construction	2.9	2.6	1.4
Exports	14.1	10.3	6.6
Imports	12.6	9.5	8.1

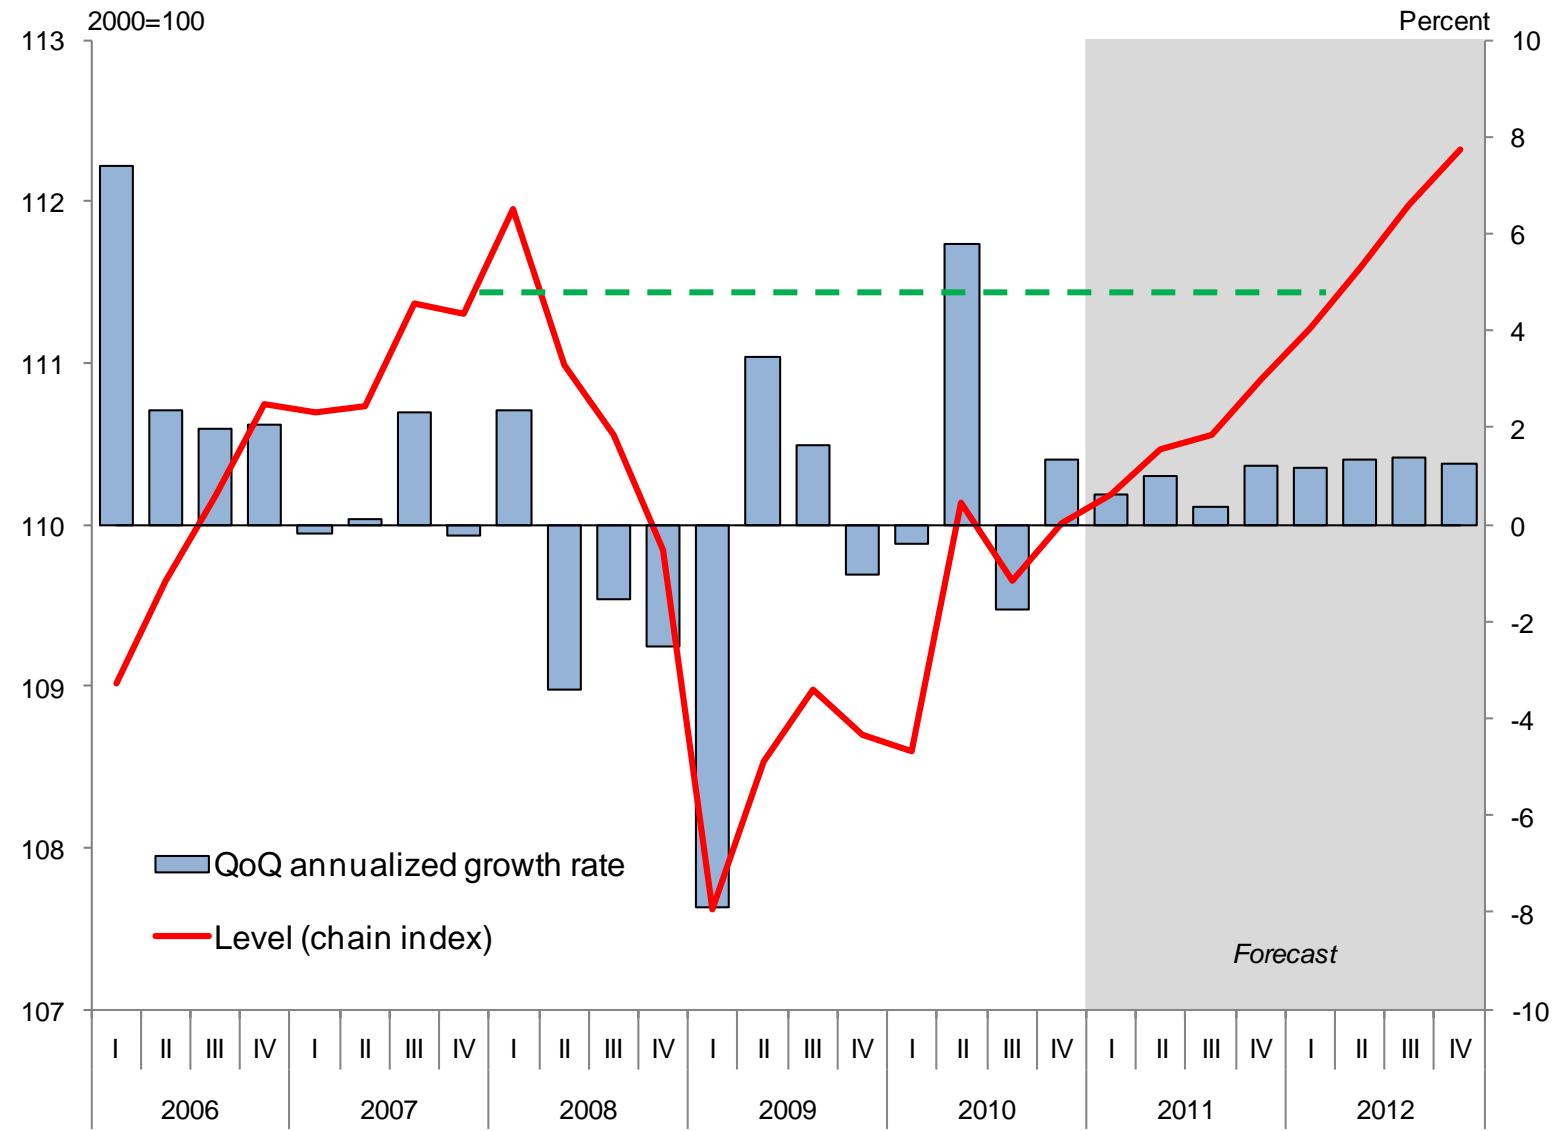

Employment at an all-time high ...

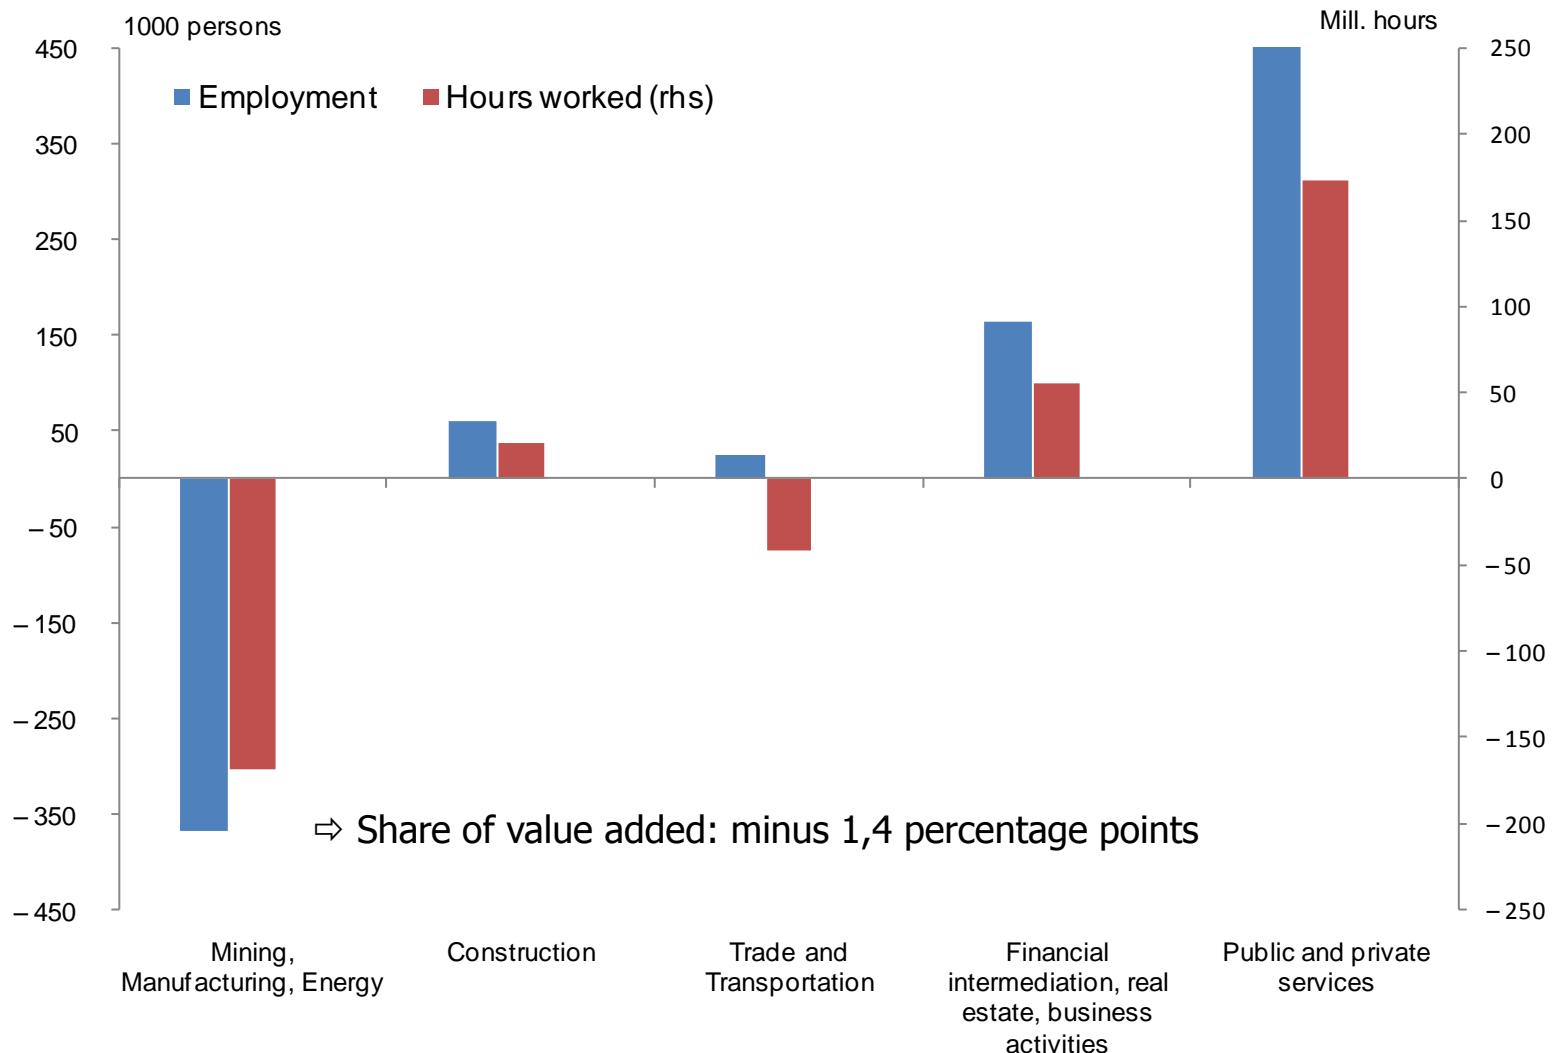

... total hours worked above pre-crisis levels ...

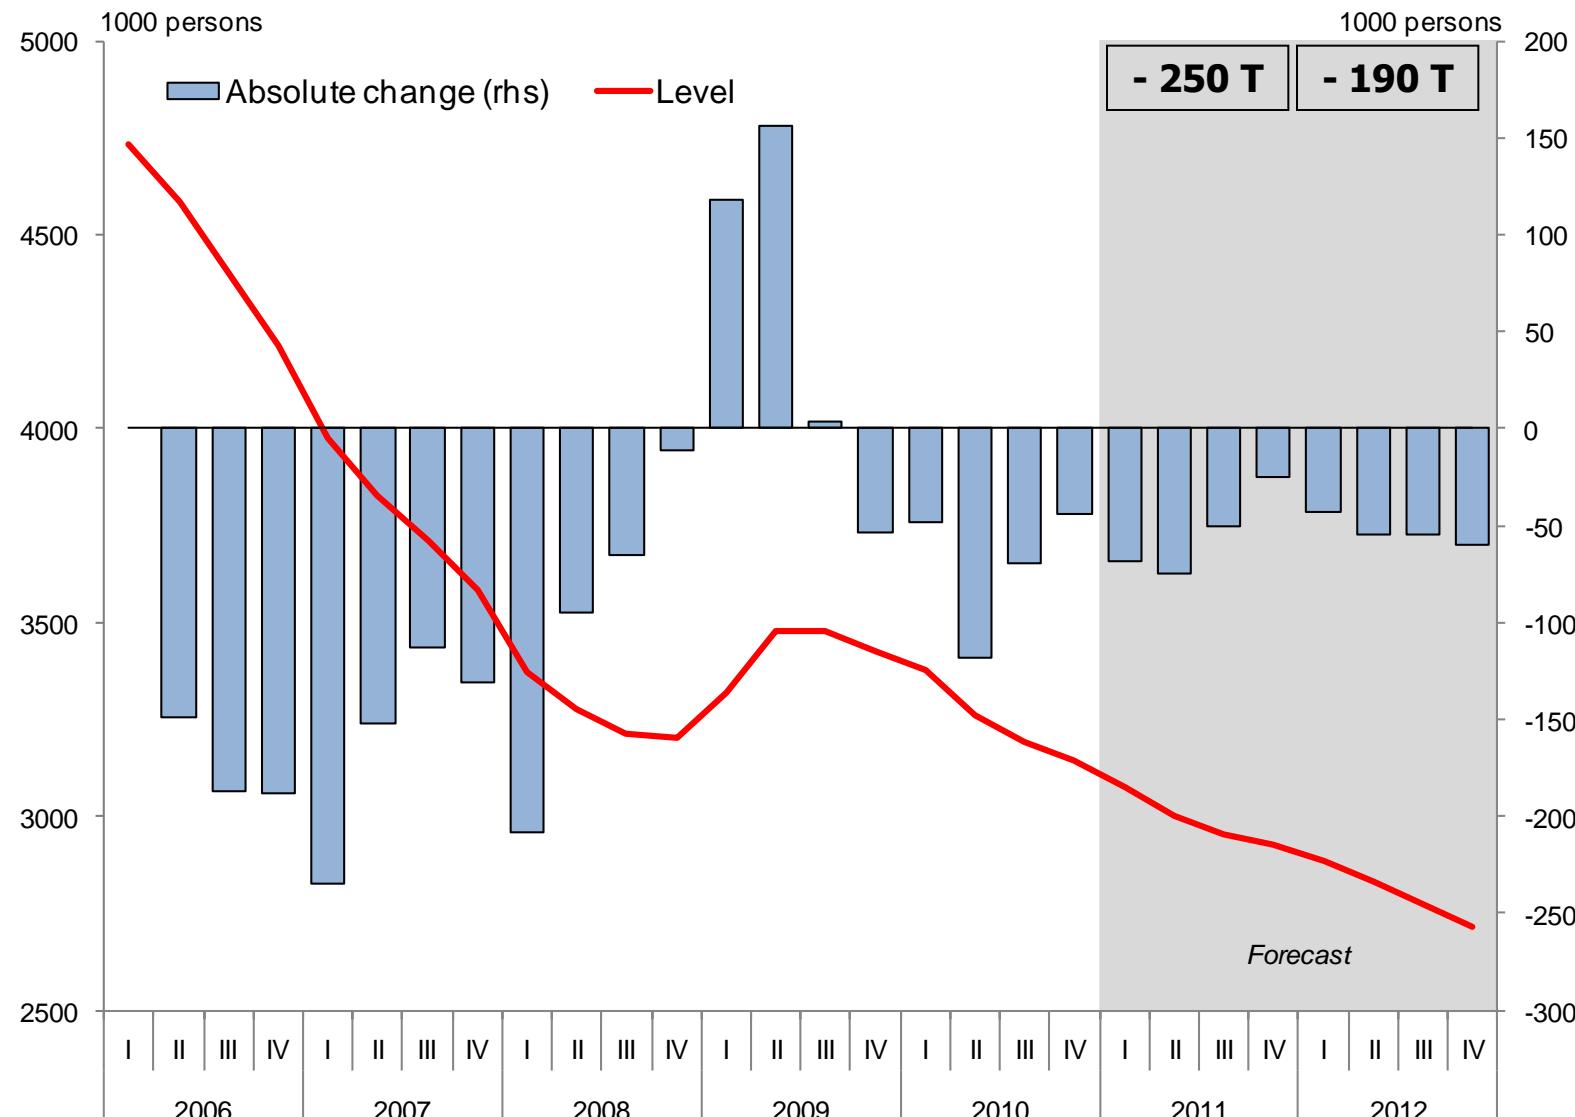

... but 4 lost years of labor productivity growth

Significant shift of employment towards services

Unemployment: 3 mill. (2011), 2.8 mill (2012)

20

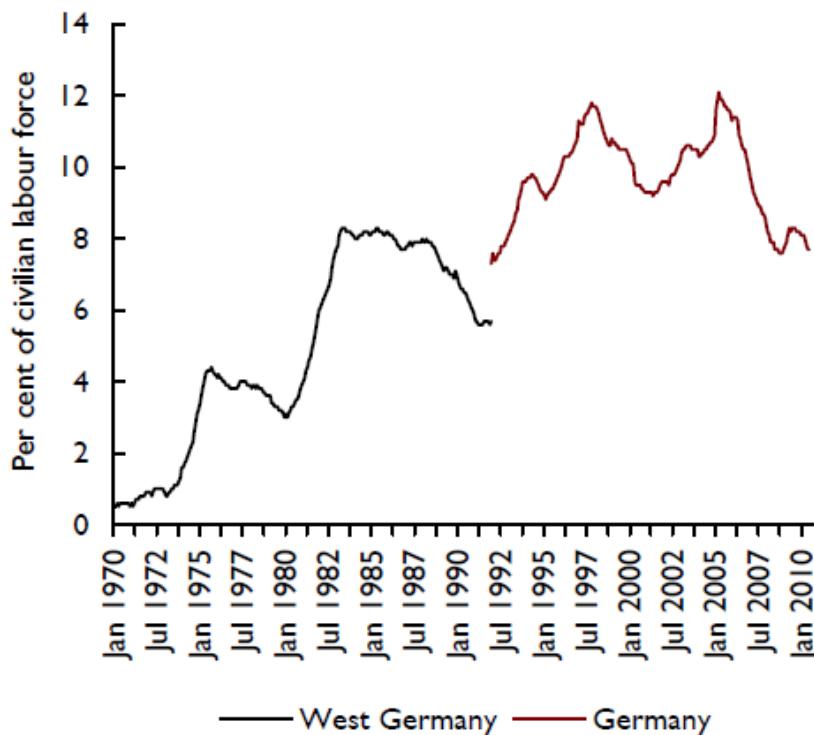

Perspectives allemandes

CEPII, 27 April 2011

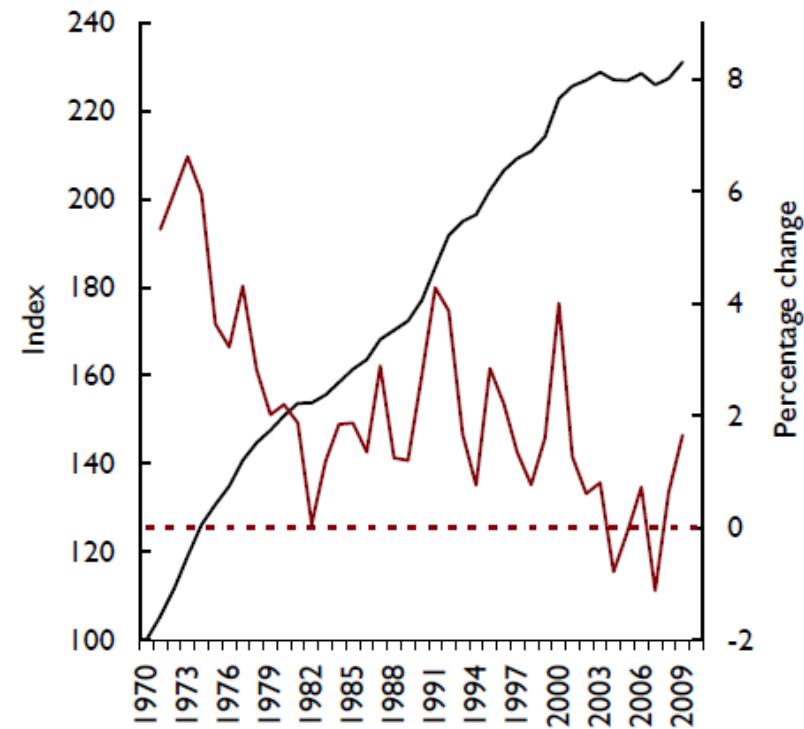

Quarterly data, volumes, seasonally adjusted

The German labor market „miracle“

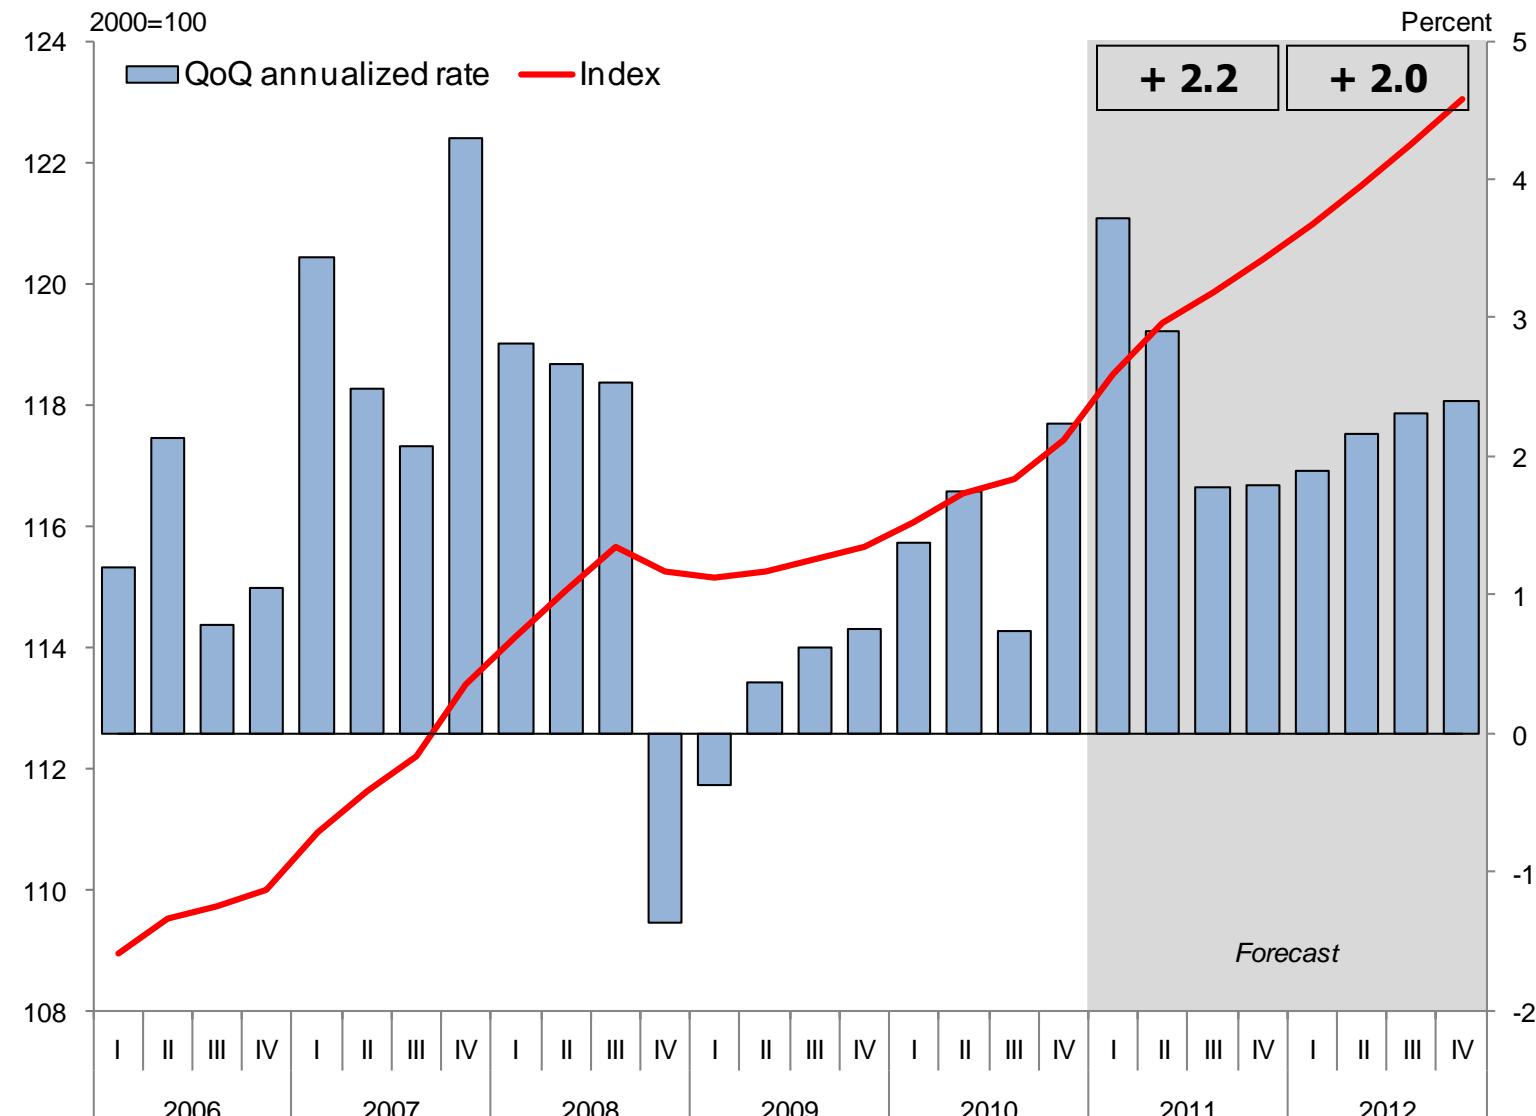

Unemployment rate

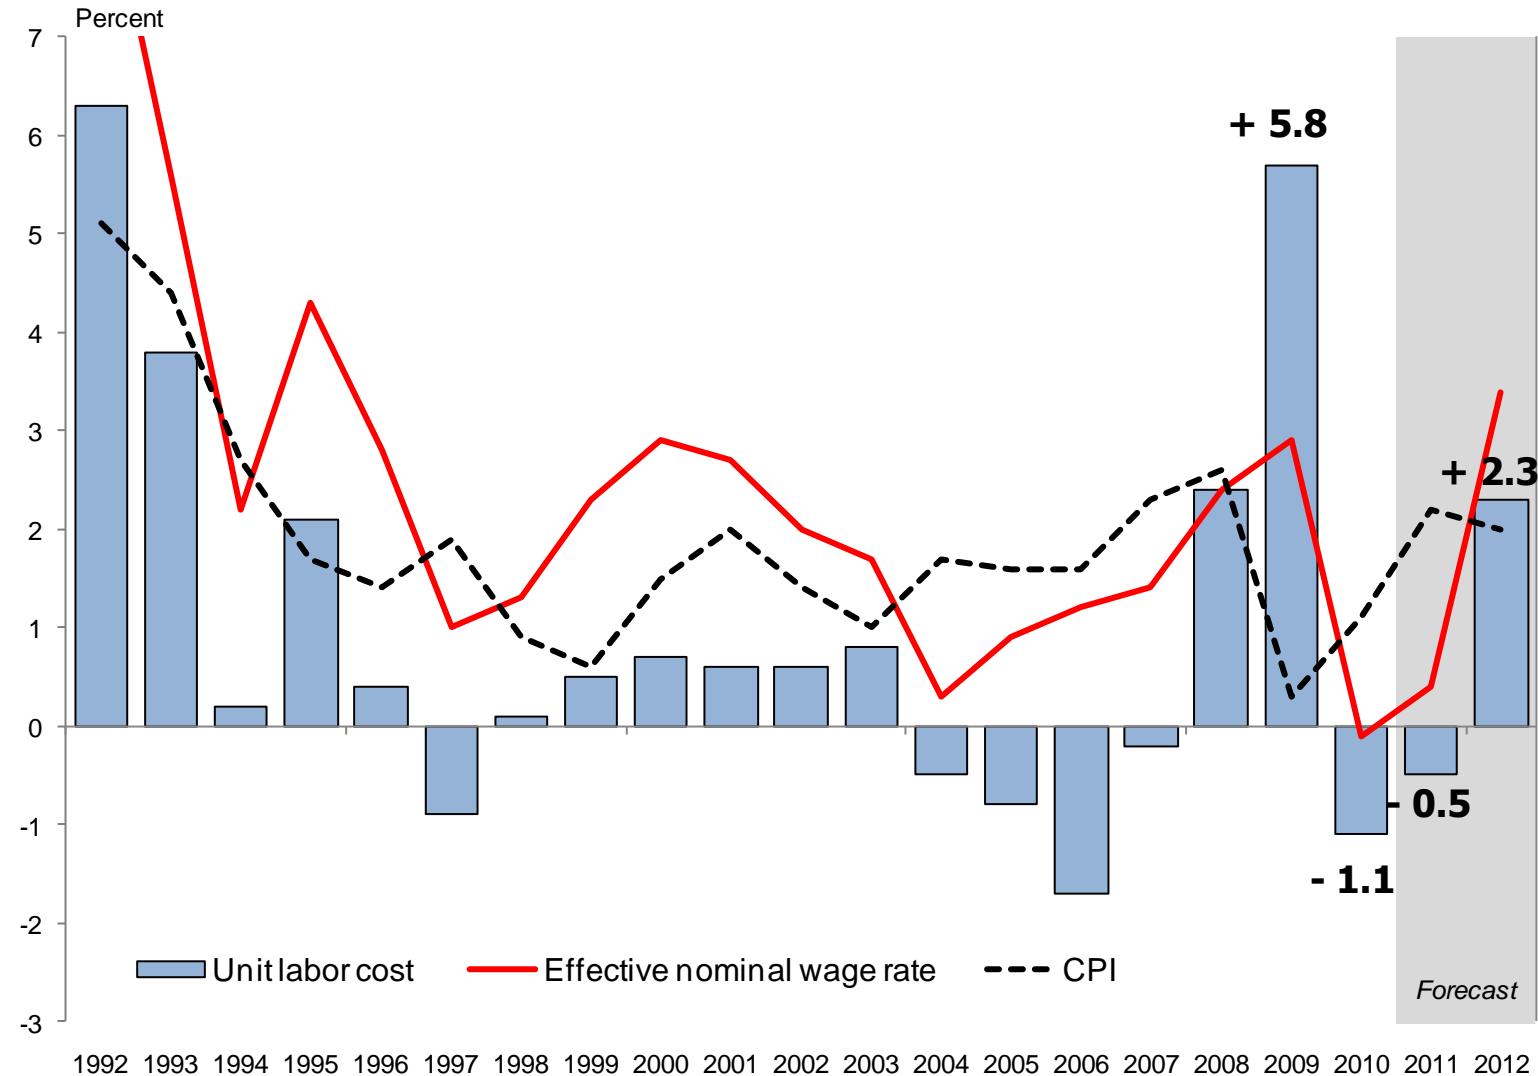

Real hourly gross wage rate

Consumer prices: Inflation is picking up

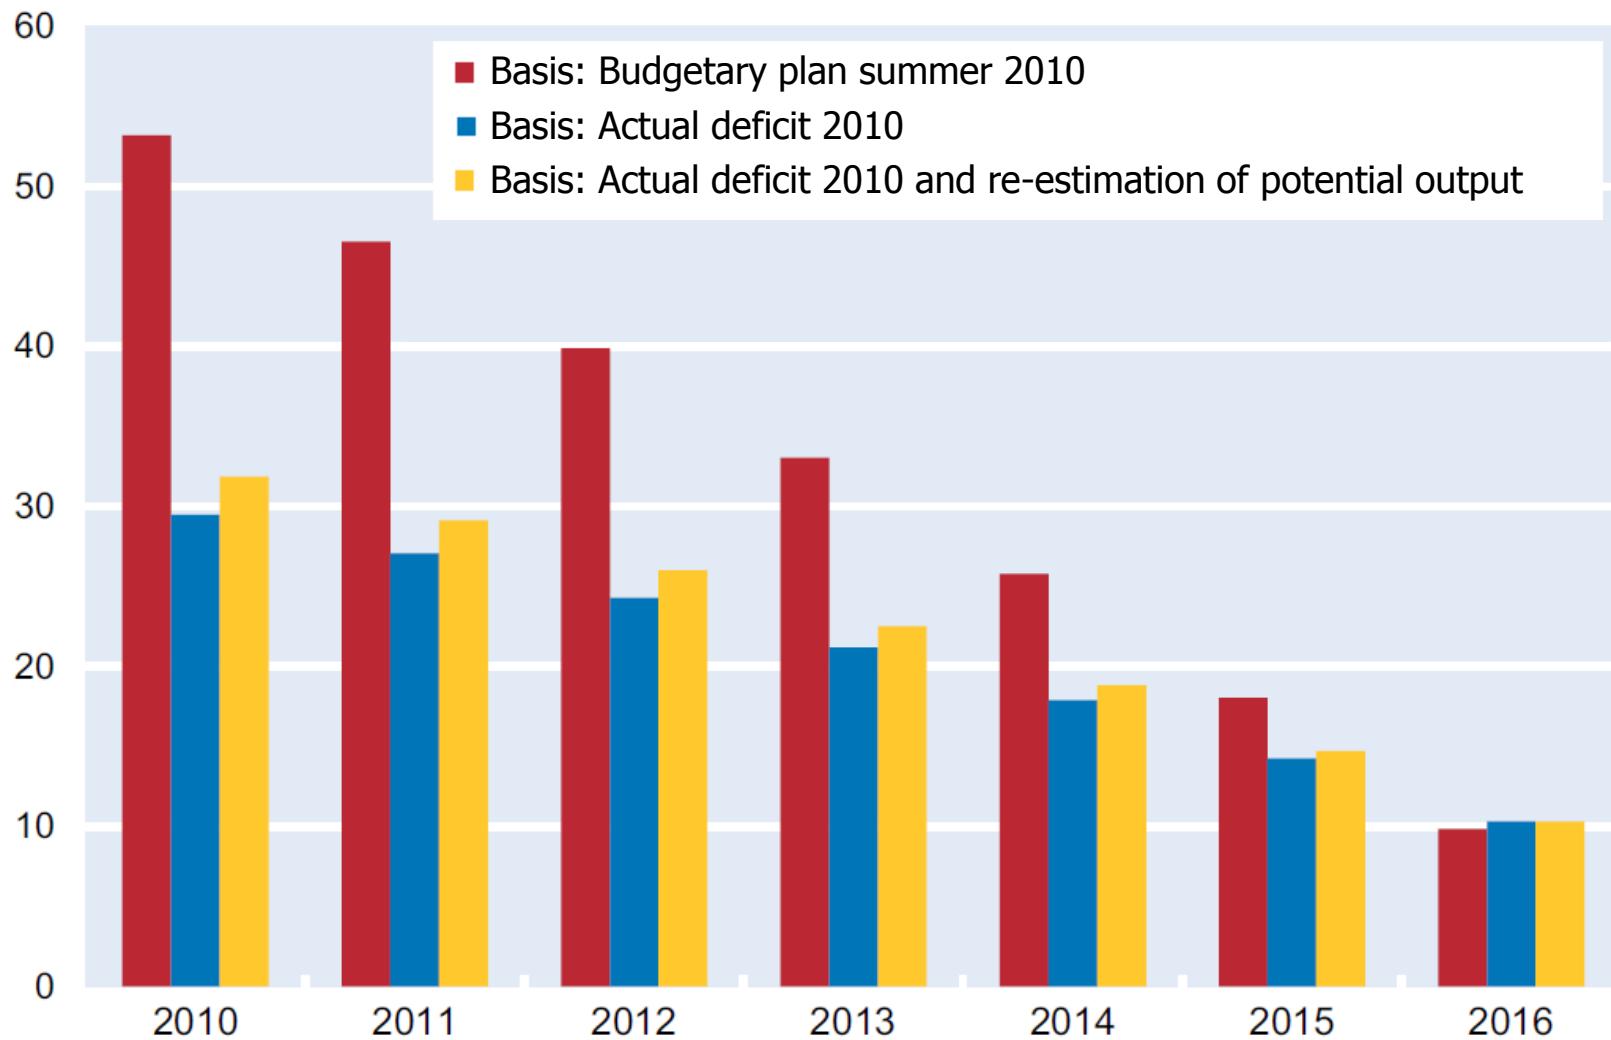

Unit labor cost: A domestic inflation driver on hold

Fiscal consolidation paths (German debt brake)

Maximum structural federal deficits (bn. Euro)

Key fiscal figures

	2010	2011	2012
Deficit (relation to GDP)	3.3	2.5	1.8
Expenditures (yo-y-change)	1.6	1.3	1.8
Revenues (yo-y-change)	0.9	3.1	3.5
Demand-side impact vis-à-vis 2010 (rel. to GDP)	X	-0.5	-0.4
Public debt (relation to GDP)	83.5	83.5	83.1

Major scars left after the crisis

- Fiscal stance (public debt as % of GDP)
 - 66.3 % (2008) \Rightarrow 83.5 % (2010)
 - 10 % of tax income for interest payments
 - Interest rates: +100 bps \Rightarrow +18 bn. Euro
- Forgone production (2008-Q2 to 2010-Q4)
 - Volume of 170 bn. Euro = 7.5 % of annual GDP (compared to no-growth-scenario)
- 4 years of lost productivity growth

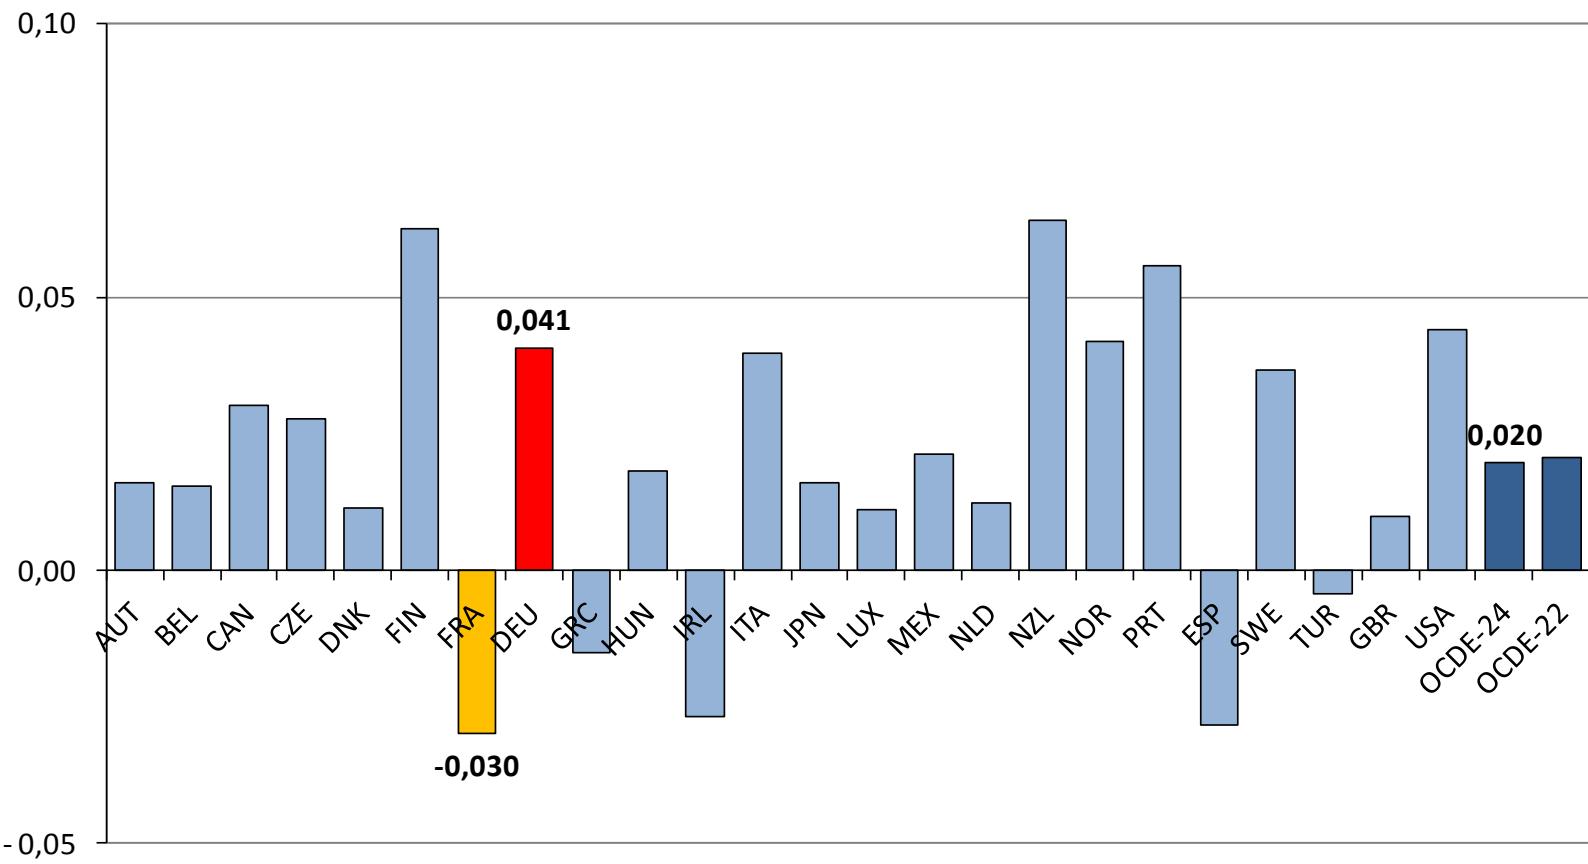

Income distribution
